*China's Rise and Regional Integration in East Asia* Yong Wook Lee, Key-young Son, 2014-03-05 With featuring far reaching diversities and disparities among the regional states in their political economic and social systems and cultural and religious orientations East Asia is a microcosm of international society at large Nevertheless there are unique dynamics unfolding in East Asia at the turn of the twenty first century namely the rise of China as a contender for regional and global hegemony and a set of collective initiatives to integrate the region into a harmonious community This book provides new arguments on China's rise and the transformation of East Asia and analyzes the foreign policy behavior of the regional states and relations among them In doing so the contributors show why and how China is rising and how China's rise shapes the emerging regional structures and institutions in East Asia Furthermore given the East Asian context where the world's second and third largest economies coexist with much smaller states and with China's ascendancy likely to continue this book challenges the pervasive dichotomy of hegemony and community This allows for a fuller and more nuanced account of China's role and the shifting regional policies in East Asia in which hegemonic cooperation does not necessarily lead to a hegemonic form of regional order Presenting strategic political economic and historical perspectives on China's changing role in the region and the development of regionalism China's Rise and Regional Integration in East Asia will be of great interest to students and scholars of Chinese politics Asian politics international relations and regionalism *Economic Paper* United States.
