

Application of Paper Chromatography

- For the separation of organic, inorganic, biochemical and natural products

- Metal ions having same chemical properties or belonging to the same group can be detected and separated

- The technique is useful for the separation of metal ligand chelate or complexes, it's also useful for the separation of isomer.

- The purity of a sample can be tested .In this case pure sample can produce only one spot where as impure sample can produce two or more.

- It is useful in the field of biochemistry.

- It is very useful technique in the field of food, drugs and cosmetics.
