From School to Work United States. National Commission for Manpower Policy,1976 A collection of policy papers T p Handbook of Labor Economics Orley Ashenfelter,1986 Annotation The Handbook brings together a systematic review of the research topics empirical findings and methods that comprise modern labor economics It serves as an introduction to what has been done in this field while at the same time indicating possible future trends which will be important in both spheres of public and private decision making Part 1 is concerned with the classic topics of labor supply and demand the size and nature of the elasticities between the two and their impact on the wage structure This analysis touches on two fundamental questions what are the sources of income inequality and what are the disincentive effects of attempts to produce a more equal income distribution The papers in Part II proceed from the common observation that the dissimilarity in worker skills and employer demands often tempers the outcomes that would be expected in frictionless labor markets And the last section of the Handbook deals explicitly with the role of institutional structures e g trade unions that now form an important part of modern labor economics Sessional Papers Great Britain. Policy Studies: Review Annual Bruce B. Zellner,2019-01-22 Every editor of the Policy Studies Review Annual brings a unique perspective to bear in selecting articles to be included This perspective reflects varying methodological and disciplinary judgments varying judgments on what the field of policy studies or policy analysis is and where it should be going and varying judgments regarding the quality of articles which are or claim to be in the field Because it is the objective to assemble a set of essays which are both interesting and topical there will be varying perspectives on these matters as well The volume clearly reflects the editors perspectives They are explicit about these judgments and perspectives and then let the content of the volume speak for itself First we are both economists As a result the general topics selected and the articles chosen under each topic tend to emphasize economics more than the other disciplines involved in the field of policy studies sociology psychology political science law and so on This emphasis is clearly seen by comparing the contents of volume I edited by Stuart Nagel a political scientist and volume II edited by Howard Freeman a sociologist with that of this volume Second the editors have a particular view of what policy studies or policy analysis is That view has several aspects In the first place they feel that the field of policy studies or policy analysis must define itself and this definition will develop as researchers do just what the title of the field says study or analyze policies A corollary of this view is that we place a low weight on papers which discuss the policy process or reforms in policy making relative to papers which analyze a policy a policy proposal or a problem which leads to calls for policy action

NBER Macroeconomics Annual 1998 Ben Bernanke, Julio Rotemberg, 1999 The goals of the annual NBER Macroeconomics Conference are to present extend and apply frontier work in macroeconomics and to stimulate work by macroeconomists in policy issues Each paper in the Annual is followed by comments and discussion
