Every one of these seven fibrils is composed of two to three strands which are twisted together. Because its first use was to join a parachute to the rigging, paracord is also called parachute cord. Now paracord is often transformed into fashionable bracelets which people wear around their wrist. These bracelets come in nearly every color or pattern possible. Since they are able to surely help get the wearer out of rough survival scenarios, they in many cases are called survival bracelets. There are paracord sellers that call their twine 550 but sell low cost, low quality twine made abroad. In the event a reputable producer doesn't make the twine you get, then it might not really hold up to 550 pounds. Members of the military frequently like to make bracelets that are paracord in remembrance of people that are POWs or MIA. Others wear the bracelets to recall the time they've served in the military.
