Paradise Lost And The Cosmological Revolution:

Paradise Lost and the Cosmological Revolution Dennis Richard Danielson, 2014 This volume brings John Milton's *Paradise Lost* into dialogue with the challenges of cosmology and the world of Galileo whom Milton met and admired a universe encompassing space travel an earth that participates vibrantly in the cosmic dance and stars that are world's Of destined habitation Milton's bold depiction of our universe as merely a small part of a larger multiverse allows the removal of hell from the center of the earth to a location in the primordial abyss In this wide ranging work Dennis Danielson lucidly unfolds early modern cosmological debates engaging not only Galileo but also Copernicus Tycho Kepler and the English Copernicans thus placing Milton at a rich crossroads of epic poetry and the history of science Paradise Lost and the Cosmological Revolution Dennis Danielson, 2014-11-06 This volume brings John Milton's *Paradise Lost* into dialogue with the challenges of cosmology and the world of Galileo whom Milton met and admired a universe encompassing space travel an earth that participates vibrantly in the cosmic dance and stars that are world's Of destined habitation Milton's bold depiction of our universe as merely a small part of a larger multiverse allows the removal of hell from the center of the earth to a location in the primordial abyss In this wide ranging work Dennis Danielson lucidly unfolds early modern cosmological debates engaging not only Galileo but also Copernicus Tycho Kepler and the English Copernicans thus placing Milton at a rich crossroads of epic poetry and the history of science **Milton and the Making of Paradise Lost** William Poole, 2023-01-18 An authoritative and accessible introduction to Milton's life and an engaging examination of the process of composing *Paradise Lost* Choice In early 1642 Milton promised English readers a work of literature so great that they should not willingly let it die Twenty five years later the epic poem *Paradise Lost* appeared in print In the interim however the poet had gone totally blind and had also become a controversial public figure a man who had argued for the abolition of bishops freedom of the press the right to divorce and the prerogative of a nation to depose and put to death an unsatisfactory ruler These views had rendered him an outcast William Poole devotes particular attention to Milton's personal life his reading and education his ambitions and anxieties and the way he presented himself to the world Although always a poet first Milton was also a theologian and civil servant vocations that informed the composition of his masterpiece At the emotional center of this narrative is the astounding fact that Milton lost his sight in 1652 How did a blind man compose this intensely visual work Poole opens up the world of Milton's masterpiece to modern readers first by exploring Milton's life and intellectual preoccupations and then by explaining the poem itself its structure content and meaning Poole's book may well become what he shows *Paradise Lost* soon became a classic Times Literary Supplement Smart and original Demonstrates with astonishing exactitude how Milton's life and most impressively of all his reading enabled this epic The Spectator This deeply learned and lucidly written book makes this most ambitious of early modern poets accessible to his modern readers Journal of British Studies *Milton and the Making of Paradise Lost* William Poole, 2017-10-09 William Poole recounts Milton's life as England

section Christian scientists detail the latest scientific findings regarding the possibility of life on exoplanets The second part brings together leading Catholic science fiction authors who describe how alien life forms have been prevalent in the Catholic imagination from the Middle Ages right up to the present day In the final section Catholic philosophers and theologians examine the implications of discovering intelligent life elsewhere in the universe Rather than worrying that the discovery of intelligent extraterrestrials might threaten the dignity of humans or their existence the contributors here maintain that such creatures should be welcomed as fellow creatures of God and potential subjects of divine salvation

Milton, Longinus, and the Sublime in the Seventeenth Century Thomas Matthew Vozar, 2023-11-14 No author in the English canon seems more deserving of the epithet sublime than John Milton Yet Milton's sublimity has long been dismissed as an invention of eighteenth century criticism The poet himself the story goes could hardly have had any notion of the sublime a concept that only took shape in the decades after his death with the advent of philosophical aesthetics Such a narrative however fails to account for the fact that Milton is one of the first writers in English to refer to Longinus the author traditionally associated with the Ancient Greek treatise *On the Sublime* This book argues that Milton did have an idea of the sublime one that came to him from Longinus but also from a larger classical tradition that offered a pre aesthetic predecessor to the aesthetic concept of the sublime Thomas Vozar shows that Longinus was better known in early modern England than has been previously appreciated that various notions of sublimity beyond that of Longinus would have been available to Milton and his contemporaries and that such notions of the sublime were integral to Milton's rhetorical scientific and theological imagination Additional material relating to the early modern reception of Longinus is provided in the appendices which contain the first bibliographical study of copies of Longinus in English private libraries to 1674 and an edition of a newly discovered seventeenth century English translation of Longinus Far from being anachronistic Milton's abstracted sublimities touch on almost every aspect of his thought from rhetoric to politics from science to theology Making substantive contributions to literary scholarship classical reception studies and the history of ideas *Milton Longinus and the Sublime in the Seventeenth Century* returns the sublime to its proper place at the forefront of Milton criticism re evaluates the diffusion of Longinian texts and concepts in early modern Europe and records a crucial missing chapter in the history of the sublime

Travel and Conflict in the Early Modern World Gábor Gelléri, Rachel Willie, 2020-12-18 This edited collection examines the meeting points between travel mobility and conflict to uncover the experience of travel whether real or imagined in the early modern world Until relatively recently both domestic travel and voyages to the wider world remained dangerous undertakings Physical travel whether initiated by religious conversion and pilgrimage diplomacy trade war or the desire to encounter other cultures inevitably heralded disruption contact zones witnessed cultural encounters that were not always cordial despite the knowledge acquisition and financial gain that could be reaped from travel Vast compendia of travel such as Hakluyt's *Principles of Navigation Voyages and Discoveries* printed from the late sixteenth century and Prevost's

Histoire Générale des Voyages 1746-1759 underscored European exploration as a marker of European progress and in so doing showed the tensions that can arise as a consequence of interaction with other cultures. In focusing upon language acquisition and translation, travel and religion, travel and politics, and imaginary travel, the essays in this collection tease out the ways in which travel was both obstructed and enriched by conflict.

The Oxford History of Poetry in English

,2024-10-25 The Oxford History of Poetry in English (OHOPE) is designed to offer a fresh, multi-voiced and comprehensive analysis of poetry from Anglo-Saxon culture through contemporary British, Irish, American, and Global culture, including English, Scottish, and Welsh poetry, Anglo-American colonial and post-colonial poetry, and poetry in Canada, Australia, New Zealand, the Caribbean, India, Africa, Asia, and other international locales. OHOPE both synthesizes existing scholarship and presents cutting-edge research, employing a global team of expert contributors for each of the fourteen volumes. By taking as its purview the full seventeenth century (1603-1700), this volume redraws the existing literary historical map and expands upon recent rethinking of the canon. Placing the revolutionary years at the centre of a century of poetic transformation and putting the Restoration back into the seventeenth century, the volume registers the transformative effects on poetic forms of a century of social, political, and religious upheaval. It considers the achievements of a number of women poets not yet fully integrated into traditional literary histories. It assimilates the vibrant literature of the English Revolution to what came before and after, registering its long-term impact. It traces the development of print culture and of the literary marketplace alongside the continued circulation of poetry in manuscript. It places John Milton, Andrew Marvell, Margaret Cavendish, and Katherine Philips and other mid-century poets into the full century of specifically literary development. It traces continuity and change, imitation and innovation in the full-century trajectory of such poetic genres as sonnet, elegy, satire, georgic, epigram, ode, devotional lyric, and epic. The volume's attention to poetic form builds on the current upswing in historicist formalism, allowing a close focus on poetry as an intensely aesthetic and social literary mode. Designed for maximum classroom utility, the organization is both thematic and, in the authors' section, chronological. After a comprehensive Introduction, organizational sections focus on Transitions, Materiality, Production and Circulation, Poetics and Form, Genres, and Poets.

The Routledge Research Companion to Nineteenth-Century British Literature and Science John Holmes, Sharon Ruston, 2017-05-18 Tracing the continuities and trends in the complex relationship between literature and science in the long nineteenth century, this companion provides scholars with a comprehensive, authoritative, and up-to-date foundation for research in this field. In intellectual, material, and social terms, the transformation undergone by Western culture over the period was unprecedented. Many of these changes were grounded in the growth of science. Yet science was not a cultural monolith; then any more than it is now, and its development was shaped by competing world views. To cover the full range of literary engagements with science in the nineteenth century, this companion consists of twenty-seven chapters by experts in the field, which explore crucial social and intellectual contexts for the interactions between literature and science, how science affected different

genres of writing and the importance of individual scientific disciplines and concepts within literary culture Each chapter has its own extensive bibliography The volume as a whole is rounded out with a synoptic introduction by the editors and an afterword by the eminent historian of nineteenth century science Bernard Lightman

Political Turmoil: Early Modern British Literature in Transition, 1623-1660: Volume 2 Stephen B. Dobranski, 2019-01-31 The early modern period in Britain was defined by tremendous upheaval the upending of monarchy the unsettling of church doctrine and the pursuit of a new method of inquiry based on an inductive experimental model Political Turmoil Early Modern Literature in Transition 1623 1660 offers an innovative and ambitious re appraisal of seventeenth century British literature and history Each of the contributors attempts to address the how and why of aesthetic change by focusing on political and cultural transformations Instead of forging a grand narrative of continuity the contributors attempt to piece together the often complex web of factors and events that contributed to developments in literary form and matter as well as the social and religious changes that literature sometimes helped to occasion These twenty chapters reading across traditional periodization demonstrate that early modern literary works when they were conceived as they were created and after they circulated were above all involved in various types of transitions

The Eschatological Imagination Wietse de Boer, Christine Göttler, 2024-10-21 How did the early modern Christian West conceive of the spaces and times of the afterlife The answer to this question is not obvious for a period that saw profound changes in theology when the telescope revealed the heavens to be as changeable and imperfect as the earth and when archaeological and geological investigations made the earth and what lies beneath it another privileged site for the acquisition of new knowledge With its focus on the eschatological imagination at a time of transformation in cosmology this volume opens up new ways of studying early modern religious ideas representations and practices The individual chapters explore a wealth of at times little known visual and textual sources Together they highlight how closely concepts and imaginaries of the hereafter were intertwined with the realities of the here and now Contributors Matteo Al Kalak Monica Azzolini Wietse de Boer Christine G ttler Luke Holloway Martha McGill Walter S Melion Mia M Mochizuki Laurent Paya Rapha le Preisinger Aviva Rothman Minou Schraven Anna Claire Stinebring Jane Tylus and Antoinina Bevan Zlatar

A New Copernican Turn Doru Costache, Geraint F. Lewis, 2024-07-17 This short book discusses the latest in terms of cosmology s knowns and unknowns and sets out to ascertain the potential of Orthodox Christian theology for accommodating the current scientific view of the universe It also addresses one of cosmology s unknowns the destiny of the self in the vastness of space a topic that has caused angst since the dawn of modern science The book examines accordingly the signs of a New Copernican Turn within contemporary culture favouring the self and its meaningful encounters with the infinite universe at the forefront of which being the quest for a physics that views something akin to the self as undergirding reality not as an inconsequential byproduct of natural phenomena The book further shows that theological spiritual and religious forms of nature contemplation and wonder facilitate the self s creative intersection with the universe It amounts to

an exercise in science engaged Orthodox theology that takes contemporary cosmology as a starting point The intended audience of this book is scholars and researchers of science and religion religious studies philosophers and theologians

Milton's Complex Words Paul Hammond,2017-11-17 Every major poet or philosopher develops their own distinctive semantic field around those terms which matter most to them or which contribute most profoundly to the imagined world of a particular work This book explores the specific meanings which Milton develops around key words in *Paradise Lost* Some of these are theological or philosophical terms e g evil grace reason others are words which shape the imagined world of the poem e g dark fall within yet others are small words or even prefixes which subtly move the argument in new directions e g if not re Milton seems to expect his readers to be alert to the special semantic field which he creates around such words often by infusing them with biblical and literary connotations and activating their etymological roots alert also to the patterns created by the repetitions of such words and particularly to their diverse use and often their blatant misuse by different characters To understand the migrations and malleability of key words is part of the education of Milton's reader

The Moving Body and the English Romantic Imaginary Kristin Flieger Samuelian,2021-05-30 The *Moving Body and the English Romantic Imaginary* explores ways in which England in the Romantic period conceptualized its relation both to its constituent parts within the United Kingdom and to the larger world through discussions of dance dancing and dancers and through theories of dance and performance As a referent that both engaged and constructed the body through physical training anatomization spectacle and spectatorship pathology parody and sentiment dance worked to produce an English exceptional body Discussions of dance in fiction and periodical essays as well as its visual representation in print culture were important ways to theorize points of contact as England was investing itself in the world as an economic and imperial power during and after the Revolutionary period These formulations offer dance as an engine for the reconfiguration of gender class and national identity in the print culture of late eighteenth and nineteenth century England

Milton and the New Scientific Age Catherine Martin,2019-04-10 *Milton and the New Scientific Age* represents significant advantages over all previous volumes on the subject of Milton and science as it includes contributions from top scholars and prominent beginners in a broad number of fields Most of these fields have long dominated work in both Milton and seventeenth century studies but they have previously not included the relatively new and revolutionary topic of early modern chemistry physiology and medicine Previously this subject was confined to the history of science with little if any attention to its literary development even though it prominently appears in John Milton's *Paradise Lost* which also includes early science fiction speculations on aliens ignored by most readers Both of these oversights are corrected in this essay collection while more traditional areas of research have been updated They include Milton's relationship both to Bacon and the later or Royal Society Baconians his views on astronomy and his vitalist views on biology and cosmology In treating these topics our contributors are not mired in speculations about whether or not Milton was on the cutting edge of early science or science

fiction for as nearly all of them show the idea of a cutting edge is deeply anachronistic at a time when most scientists and scientific enthusiasts held both fully modern and backward looking beliefs By treating these combinations contextually Milton's literary contributions to the new science are significantly clarified along with his many contemporary sources all of which merit study in their own right

Intersections of Religion and Astronomy Chris Corbally, Darryl Dinell, Aaron Ricker, 2020-11-01 This volume examines the way in which cultural ideas about the heavens shape religious ideas and are shaped by them in return Our approaches to cosmology have a profound effect on the way in which we each deal with religious questions and participate in the imaginative work of public and private world building Employing an interdisciplinary team of international scholars each chapter shows how religion and cosmology interrelate and matter for real people Historical and contemporary case studies are included to demonstrate the lived reality of a variety of faith traditions and their interactions with the cosmos This breadth of scope allows readers to get a unique overview of how religion science and our view of space have and will continue to impact our worldviews Offering a comprehensive exploration of humanity and its relationship with cosmology this book will be an important reference for scholars of Religion and Science Religion and Culture Interreligious Dialogue and Theology as well as those interested in Science and Culture and Public Education
