Transactions on Large-Scale Data- and Knowledge-Centered Systems LVII Abdelkader Hameurlain, A Min Tjoa, 2024-10-24. The LNCS journal Transactions on Large scale Data and Knowledge centered Systems focuses on data management, knowledge discovery and knowledge processing which are core and hot topics in computer science. Since the 1990s the Internet has become the main driving force behind application development in all domains. An increase in the demand for resource sharing e.g. computing resources, services, metadata, data sources across different sites connected through networks has led to an evolution of data and knowledge management systems from centralized systems to decentralized systems enabling large scale distributed applications providing high scalability. This is the 57th issue of Transactions on Large scale Data and Knowledge centered Systems, it contains five fully revised selected regular papers. Topics covered include leveraging machine learning for effective data management, access control models, reciprocal authorizations, Internet of Things, digital forensics, code similarity search, volunteered geographic information and spatial data quality.
