Philosophizing Ad Infinitum Suny Series In Environmental Philosophy And Ethics:

Philosophizing ad Infinitum Marcel Conche, 2014-05-08 One of France's preeminent historians of philosophy Marcel Conche has written and translated more than thirty five books and is recognized for his groundbreaking and authoritative work in Greek philosophy as well as on Montaigne. In *Philosophizing ad Infinitum* one of his most remarkable and daring books Conche articulates a unique and powerful understanding of nature inclusive of humanity as infinite in time and space ever self-renewing eternal and beyond complete understanding or control. In today's world the notion of infinity is at the core of the crisis humanity faces understanding nature. For the last two hundred years economies have been running at full speed fueled by the implicit belief that natural resources are infinite however it is clear that they are not and that humanity needs to radically rethink the foundations of environmental and economic systems. Conche seeks to begin this rethinking illustrating along the way insightful and sometimes unorthodox ideas about Plato Aristotle Epicurus Montaigne Nietzsche Bergson and others. SUNY Series in Environmental Philosophy and Ethics, 20?? Hans Jonas's Ethic of Responsibility Theresa Morris, 2013-11-01 Despite his tremendous impact on the German Green Party and the influence of his work on contemporary debates about stem cell research in the United States Hans Jonas's 1903-1993 philosophical contributions have remained partially obscured. In particular the ontological grounding he gives his ethics based on a phenomenological engagement with biology to bridge the is-ought gap has not been fully appreciated. Theresa Morris provides a comprehensive overview and analysis of Jonas's philosophy that reveals the thread that runs through all of his thought including his work on the philosophy of biology ethics the philosophy of technology and bioethics. She places Jonas's philosophy in context comparing his ideas to those of other ethical and environmental philosophers and demonstrating the relevance of his thought for our current ethical and environmental problems. Crafting strong supporting arguments for Jonas's insightful view of ethics as a matter of both reason and emotion Morris convincingly lays out his account of the basis of our responsibilities not only to the biosphere but also to current and future generations of beings. **The Incomplete Eco-Philosopher** Anthony Weston, 2009-01-15 Collected essays present Weston's pragmatic environmental philosophy calling for reconstruction and imagination rather than deconstruction and analysis. A World Not Made for Us Keith R. Peterson, 2020-09-01 In *A World Not Made for Us* Keith R. Peterson provides a broad reassessment of the field of environmental philosophy taking a fresh and critical look at three classical problems of environmentalism the intrinsic value of nature the need for an ecological worldview and a new conception of the place of humankind in nature. He makes the case that a genuinely critical environmental philosophy must adopt an ecological materialist conception of the human a pluralistic value theory that emphasizes the need for value prioritization and a stratified categorical ontology that affirms the basic principle of human asymmetrical dependence on more than human nature. Integrating environmental ethics with the latest work in political ecology Peterson argues it is important to understand that the world is not made for us and that coming to terms with this

fact is a condition for survival in future human and more than human communities of liberation and solidarity **Value, Beauty, and Nature** Brian G Henning, 2023-12 Argues that to make progress within environmental ethics philosophers must explicitly engage in environmental metaphysics For Love of Matter Freya Mathews, 2003-08-14 A bold and original work in ecocosmology and metaphysics *Earth Summit Ethics* J. Baird Callicott, Fernando J. R. da Rocha, 1996-08-23 On the eve of the 1992 Earth Summit in Rio de Janeiro Fernando J R da Rocha challenged environmental philosophers to suggest and develop effective ways in which universities might engender ecological literacy and environmental ethics The result was a preconference held in Porto Alegre Brazil whose aim was to put the summit in philosophical perspective influence its outcome and chart a new course linking environment and ethics through university education This book is an outgrowth of the Porto Alegre conference and the international environmental philosophers and educators represented here inaugurate a constructive dialogue that will continue well into the twenty first century Among the contributors to the volume are environmental philosophers Andrew Brennan J Baird Callicott Fernando J R da Rocha and Holmes Ralston III and education theorists Peter Madsen and John Lemons In addition the book introduces English language readers to the work of French philosopher Catherine Larrere Spanish philosopher Nicholas Sosa and Brazil's radical former Secretary for the Environment and deep ecologist Jose Lutzenberger *Merleau-Ponty and Environmental Philosophy* Suzanne L.
