Tongan

Tongan is an Austronesian language which is spoken by about 100,000 people, primarily in the south Pacific, in places such as Tonga, American Samoa and Fiji. There are also a few speakers in North America, Australia and New Zealand.

Consider the Tongan data below and then answer the questions that follow.

1. [fata]	'shelf'	5. [sisi]	'grand'
2. [motu]	'island'	6. [mosimosi]	'to drizzle'
3. [motomoto]	'unripe'	7. [fesi]	'to break'
4. [movete]	'to come apart'		

What is the distribution of the phones [s] and [t] in Tongan? Are they separate phonemes, or are they allophones of the same phoneme?

If you think they are separate phonemes, state the evidence showing that the two sounds are contrastive. If you think they are allophones of the same phoneme, write a phonological rule that accounts for their distribution.

Sindhi

Sindhi is an Indo-European language which is spoken primarily in Pakistan by about 21 million people.

1. [pənu]	'leaf'	7. [təru]	'bottom'
2. [vədʒu]	'opportunity'	8. [kʰoto]	'sour'
3. [ʃeki]	'suspicious'	9. [bədʒu]	'run'
4. [gədo]	'dull'	10. [bənu]	'forest'
5. [dəru]	'door'	11. [bətʃu]	'be safe'
6. [pʰənu]	'hood of snake'	12. [dʒədʒu]	'judge'

What is the distribution of the phones [p], [b] and [pʰ] in Sindhi? Are they separate phonemes, or are they allophones of the same phoneme? Give evidence for your answer by either providing a rule for the distribution of the allophones or a minimal pair for the phonemes.

Bishop, 2014-02-04 A great deal has been written on how children learn to speak but development of language comprehension has been a relatively neglected topic This book is unique in integrating research in language acquisition psycholinguistics and neuropsychology to give a comprehensive picture of the process we call comprehension right from the reception of an acoustic stimulus at the ear up to the point where we interpret the message the speaker intended to convey by the utterance A major theme of the book is that comprehension is not a unitary skill to understand spoken language one needs the ability to classify incoming speech sounds to relate them to a mental lexicon to interpret the propositions encoded by word order and grammatical inflections and to use information from the environmental and social context to select from a wide range of possible interpretations the one that was intended by the speaker Furthermore although neuropsychological and experimental research on adult comprehension can provide useful concepts and methods for assessing comprehension they should be applied with caution because a sequential bottom up information processing model of comprehension is ill suited to the developmental context The emphasis of the book is on children with specific language impairments but normal development is also given extensive coverage The focus is on research and theory rather than practical matters of assessment and intervention Nevertheless while this book is not intended as a clinical guide to assessment it does aim to provide a theoretical framework that can help clinicians develop a clearer understanding of what comprehension involves and how different types of difficulty may be pinpointed **How to Prevent Reading Difficulties, Grades PreK-3** Mark Weakland, 2021-03-16 The science of reading meets the art of teaching readers Do you have the knowledge and instructional ability to effectively teach foundational skills and to support students who show signs of reading difficulties It is a tall order and one that challenges many new and veteran teachers How to Prevent Reading Difficulties Grades PreK 3 builds on decades of evidence and years of experience to help teachers understand how the brain learns to read and how to apply that understanding to Tier 1 instruction The book includes step by step descriptions of techniques for effectively teaching phonological awareness spelling phonics vocabulary and comprehension specific Tier 1 activities routines and frameworks that build and strengthen word recognition and language comprehension links to video demonstrations and online resources clear practical explanations of the science of reading including the Eternal Triangle and the Simple View of Reading to help teachers understand the fundamentals of the reading process recognize how difficulties arise and understand how to address them A book study guide is available on the Free Resources tab to provides group guidance on how to effectively teach foundational skills and to support students who show signs of reading difficulties Author Mark Weakland brings new energy to teaching high priority foundational skills By blending the science of reading with the best instructional practices that lead to authentic reading the ultimate goal of
