, 1985 The Ladder Andrew Bernard, 2021-02-19 Foreword by Colonel Dame Kelly Holmes Regardless of one's plans for the future many people's careers are founded on a series of chance encounters experiences and serendipity School college university jobs family sports hobbies friends relationships these are all fertile grounds for career related conversations and explorations What if we teachers guides mentors parents and peers started to notice these seemingly unconnected happenings and indeed started to engineer and encourage them to happen Using the mantra every adult is a careers teacher The Ladder will inspire teachers to explicitly link their subject area to students futures both in school and outside its walls and support them in doing so Bernie draws upon his 30 year career in education and business development to bring clarity focus and ideas to educators as to how they can best start students on their own ladders to success Ultimately in writing this book Bernie's aim is to bring young people's futures to life with some personal skills reflection and forward planning designed to help them as they embark on their fulfilling futures regardless of their upbringing academic achievements or ethnic background **The Craft of College Teaching** Robert DiYanni, Anton Borst, 2020-03-03 Robert DiYanni and Anton Borst's Classroom Confidential provides a clear compact guide to the basics of college teaching Grounded in the authors classroom experience their pedagogical coaching at NYU's Center for the Advancement of Teaching and their examination of the latest learning science research it explains how to teach in the college classroom from a learner's perspective what methods principles and activities achieve the best learning outcomes Chapters address major topics from course and syllabus design to discussion based teaching critical reading and assessment while brief interludes cover various pedagogical elements and applications including what to do on the first and last days of class and how to incorporate service and experiential learning into curricula Throughout the authors provide practical suggestions and strategies while explaining the underlying pedagogical principles They also address recent topics that promise to remain fixtures of the educational

landscape such as teaching with technology and teaching in a global context They steer a middle course on technology suggesting ways to maximize its benefits while minimizing its distractions The book coheres around a philosophy of active learning and student engagement DiYanni and Borst argue that teaching practices should challenge students to think and learn requiring them to do things with newly acquired knowledge create models conduct experiments debate issues and more The authors enlist reliable scholarly research to demonstrate that active learning of the kind they advocate achieves results students learn more and better and their learning is deeper and longer lasting The authors pedagogy echoes their epistemology as they demonstrate how learning and teaching are inextricably intertwined organic rather than mechanical activities
