Sudanese International Examination 2014:

Constitution-making and Human Rights in the Sudans Lutz Oette, Mohamed Abdelsalam Babiker, 2018-12-20 Sudan and South Sudan have suffered from repeated cycles of conflict and authoritarianism resulting in serious human rights and humanitarian law violations Several efforts such as the 2005 Comprehensive Peace Agreement and transitional justice initiatives have recognized that the failure to develop a stable political and legal order is at the heart of Sudan's governance problems Following South Sudan's independence in 2011 parallel constitutional review processes are under way that have prompted intense debates about core issues of Sudan's identity governance and rule of law human rights protection and the relationship between religion and the State This book provides an in depth study of Sudan's constitutional history and current debates with a view to identifying critical factors that would enable Sudan and South Sudan to overcome the apparent failure to agree on and implement a stable order conducive to sustainable peace and human rights protection It examines relevant processes against the broader constitutional history of Sudan and identifies the building blocks for constitutional reforms through a detailed analysis of Sudanese law and politics The book addresses constitutionalism and constitutional rights protection in their political legal and institutional context in Sudan and South Sudan and the repercussions of the relationship between state and religion for the right to freedom of religion minority rights and women's rights

Transforming Sudan Alden Young, 2018 This book traces the formation of the Sudanese state following the Second World War through a developmentalist ideology

International Court Authority Mikael Rask Madsen, 2018-06-28 An innovative interdisciplinary and far reaching examination of the actual reality of international courts International Court Authority challenges fundamental preconceptions about when why and how international courts become important and authoritative actors in national regional and international politics A stellar group of scholars investigate the challenges that international courts face in transforming the formal legal authority conferred by states into an actual authority in fact that is respected by potential litigants national actors legal communities and publics Alter Helfer and Madsen provide a novel framework for conceptualizing international court authority that focuses on the reactions and practices of these key audiences Eighteen scholars from the disciplines of law political science and sociology apply this framework to study thirteen international courts operating in Africa Latin America and Europe as well as on a global level Together the contributors document and explore important and interesting variations in whether the audiences that interact with international courts around the world embrace or reject the rulings of these judicial institutions Alter Helfer and Madsen's authority framework recognizes that international judges can and often do everything they should do to ensure that their rulings possess the gravitas and stature that national courts enjoy Yet even when imbued with these characteristics the parties to the dispute potential future litigants and the broader set of actors that monitor and respond to the court's activities may fail to acknowledge the rulings as binding or take meaningful steps to modify their behaviour in response to them For

both specific judicial institutions and more generally the book documents and explains why most international courts possess de facto authority that is partial variable and highly dependent on a range of different audiences and contexts and thus is highly fragile An introduction situates the book's unique approach to conceptualizing international court authority within theoretical debates about the authority of global institutions International Court Authority also includes critical reflections on the authority framework from legal theorists international relations scholars a philosopher and an anthropologist The book's conclusion questions a number of widely shared assumptions about how social and political contexts facilitate or undermine international courts in developing de facto authority and political power
