diverse scholarship concerned with the expansion of international society is examined revealing how the process has often been understood as one dictated by Europeans From there a new approach is developed one which is better able to examine the expansion as an interactive process between individuals and which puts the African experience at the heart of study The empirical research that follows this draws upon primary sources to introduce a number of historically significant and ground breaking cases into international relations including the international relations of West Central Africa before the European arrival the emergence and growth of the trans Atlantic slave trade the attempts to civilize Africa and the scramble to colonize Africa This book argues that the expansion of international society was driven by individual interaction and was shaped by both Africans and Europeans This book will be of interest to students and scholars of international relations international relations theory history African politics the English school and constructivism Author John Anthony Pella introduces his book African and the Expansion of International Society Surrendering the Savannah http://www.routledge.com/politics/articles/featured_author_john_anthony_pella **A Political Chronology of the Americas** Europa Publications,2003-09-02 Charts the major events and memorable dates in the political histories of the countries of the region Alphabetically listed individual country chapters Chronologically lists the major events of each country Covers the economic social and cultural developments that have affected the political history of each country **A Political Chronology of the Americas** David Lea,Colette Milward,Annamarie Rowe,2001 Charts the major events and memorable dates in the political histories of the countries of the region Alphabetically listed individual country chapters Chronologically lists the major events of each country Covers the economic social and cultural developments that have affected the political history of each country

Born in Blackness: Africa, Africans, and the Making of the Modern World, 1471 to the Second World War

Howard W. French, 2021-10-12

Revealing the central yet intentionally obliterated role of Africa in the creation of modernity, *Born in Blackness* vitally reframes our understanding of world history. Traditional accounts of the making of the modern world afford a place of primacy to European history. Some credit the fifteenth century Age of Discovery and the maritime connection it established between West and East; others the accidental unearthing of the New World. Still others point to the development of the scientific method or the spread of Judeo-Christian beliefs and so on ad infinitum. The history of Africa by contrast has long been relegated to the remote outskirts of our global story. What if instead we put Africa and Africans at the very center of our thinking about the origins of modernity? In a sweeping narrative spanning more than six centuries, Howard W. French does just that for *Born in Blackness* vitally reframes the story of medieval and emerging Africa, demonstrating how the economic ascendancy of Europe, the anchoring of democracy in the West and the fulfillment of so-called Enlightenment ideals all grew out of Europe's dehumanizing engagement with the dark continent. In fact, French reveals the first impetus for the Age of Discovery was not as we are so often told, even today, Europe's yearning for ties with Asia, but rather its centuries-old desire to forge a trade in gold with legendarily rich Black societies sequestered away in the heart of West Africa. Creating a historical narrative that begins with the commencement of commercial relations between Portugal and Africa in the fifteenth century and ends with the onset of World War II, *Born in Blackness* interweaves precise historical detail with poignant personal reportage. In so doing, it dramatically retrieves the lives of major African historical figures from the unimaginably rich medieval emperors who traded with the Near East and beyond to the Kongo sovereigns who heroically battled seventeenth-century European powers to the ex-slaves who liberated Haitians from bondage and profoundly altered the course of American history. While French cogently demonstrates the centrality of Africa to the rise of the modern world, *Born in Blackness* becomes at the same time a far more significant narrative, one that reveals a long concealed history of trivialization and more often elision in depictions of African history throughout the last five hundred years. As French shows the achievements of sovereign African nations and their now far-flung peoples have time and again been etiolated and deliberately erased from modern history. As the West ascended, their stories siloed and piecemeal were swept into secluded corners, thus setting the stage for the hagiographic rise of the West theories that have endured to this day. Capacious and compelling, Laurent Dubois' *Born in Blackness* is epic history on the grand scale. In the lofty tradition of bold revisionist narratives, it reframes the story of gold and tobacco, sugar and cotton and of the greatest commodity of them all, the twelve

million people who were brought in chains from Africa to the New World whose reclaimed lives shed a harsh light on our present world *Global Historical Sociology of Race and Racism* Alexandre I.R. White, Katrina Quisumbing King, 2021-09-30 In this volume of Political Power and Social Theory a special collection of papers reconsiders race and racism from global and historical perspectives Together these articles serve as an entry point for sharpening our sociological understandings of how racism operates in current times *A Global History of Runaways* Marcus Rediker, Titas Chakraborty, Matthias van Rossum, 2019-07-30 During global capitalism's long ascent from 1600 1850 workers of all kinds slaves indentured servants convicts domestic workers soldiers and sailors repeatedly ran away from their masters and bosses with profound effects A Global History of Runaways edited by Marcus Rediker Titas Chakraborty and Matthias van Rossum compares and connects runaways in the British Danish Dutch French Mughal Portuguese and American empires Together these essays show how capitalism required vast numbers of mobile workers who would build the foundations of a new economic order At the same time these laborers challenged that order from the undermining of Danish colonization in the seventeenth century to the igniting of civil war in the United States in the nineteenth *Europeans Abroad, 1450-1750* David Ringrose, 2018-08-10 This innovative book looks beyond the traditional history of European expansion which highlights European conquests empire building and hegemony in order to explore the more human and realistic dimensions of European experiences abroad David Ringrose argues that Early Modern Europe was relatively poor and that its industrial and military technology while distinctive in some ways was not obviously superior to that of Africa or Asia As a result the interaction between Europeans abroad and the peoples they met was vastly different from the relationship created by the economic and military imperialism of the post 1750 Industrial Revolution Instead the author depicts it as a process of cultural interaction collaboration and assimilation masked by narratives of European conquest or assertion of control Ringrose convincingly shows that Europeans who went abroad before 1700 engaged in an exchange of cross cultural contact and has framed the process in its own time rather than as the precursor of what came later Then as now historical actors knew nothing of the unexpected consequences of their actions *The Slave Trade* Hugh Thomas, 2013-04-16 After many years of research award winning historian Hugh Thomas portrays in a balanced account the complete history of the slave trade Beginning with the first Portuguese slaving expeditions Hugh Thomas describes and analyzes the rise of one of the largest and most elaborate maritime and commercial ventures in all of history Between 1492 and 1870 approximately eleven million black slaves were carried from Africa to the Americas to work on plantations in mines or as servants in houses The Slave Trade is alive with villains and heroes and illuminated by eyewitness accounts Hugh Thomas's achievement is not only to present a compelling history of the time but to answer controversial questions as to who the traders were the extent of the profits and why so many African rulers and peoples willingly collaborated **JOURNAL OF THE STATISIRICAL SOCIETY OF LONDON** ,1863
