

Gr 12 Geography

SETTLEMENT GEOGRAPHY

2.1 How site and situation affect the location of rural settlements

PHYSICAL FACTORS:

- ✓ Early settlements develop around a subsistence farming
- ✓ Choice of site is linked to physical aspects of site

1. Availability of fresh water supply

2. Farming factors

Fertile and arable land or land that provides good grazing for livestock

Land that are flat or gentle are also preferred.

3. Availability of building material and energy resources

Stone, clay, mud, grass and wood were used to build houses. Burning of wood was used as a source for heating and cooking.

4. Positive effects of microclimate

Southern hemisphere – settle on north-facing slopes: direct sunshine, heat and light.

Hilly areas – settlements on warmer inversion layer

Not settlements in hill tops or valley floors: low temperature specially at night.

ECONOMIC FACTORS

- ✓ Fertile, well-drained soil and grazing land attracts commercial farming settlements.
- ✓ Natural harbour, close to productive fishing grounds leads to the development of settlements.
