Richards,2003-05-15 It was the age of exploration the age of empire and conquest and human beings were extending their reach and their numbers as never before In the process they were intervening in the world's natural environment in equally unprecedented and dramatic

ways A sweeping work of environmental history The Unending Frontier offers a truly global perspective on the profound impact of humanity on the natural world in the early modern period John F Richards identifies four broadly shared historical processes that speeded environmental change from roughly 1500 to 1800 c e intensified human land use along settlement frontiers biological invasions commercial hunting of wildlife and problems of energy scarcity The Unending Frontier considers each of these trends in a series of case studies sometimes of a particular place such as Tokugawa Japan and early modern England and China sometimes of a particular activity such as the fur trade in North America and Russia cod fishing in the North Atlantic and whaling in the Arctic Throughout Richards shows how humans whether clearing forests or draining wetlands transporting bacteria insects and livestock hunting species to extinction or reshaping landscapes altered the material well being of the natural world along with their own

Constitutionalism, Legitimacy, and Power Kelly L Grotke, Markus J Prutsch, 2014-09-25 If one counts the production of constitutional documents alone the nineteenth century can lay claim to being a constitutional age one in which the generation and reception of constitutional texts served as a centre of gravity around which law and politics consistently revolved This volume critically re examines the role of constitutionalism in that period in order to counter established teleological narratives that imply a consistent development from absolutism towards inclusive participatory democracy Various aspects of constitutional histories within and outside of Europe are examined from a comparative transnational and multidisciplinary historical perspective organized around five key themes The first part looks at constitutions as anti revolutionary devices and addresses state building monarchical constitutionalism and restorations The second part takes up constitutions and the justification of new social inequalities focusing on women s suffrage human rights and property The third part uses individual country studies to take on questions of how constitutions served to promote nationalism The use of constitutions as instruments of imperialism is covered in the fourth part and the final part examines the ways that constitutions function simultaneously as legal and political texts These themes reflect a certain scepticism regarding any easy relationship between stated constitutional ideals and enacted constitutional practices Taken together they also function as a general working hypothesis about the role of constitutions in the establishment and maintenance of a domestically and internationally imbalanced status quo of which we are the present day inheritors More particularly this volume addresses the question of the extent to which nineteenth century constitutionalism may have set the stage for new forms of domination and discrimination rather than inaugurating a period of progress and increasing equality

Museum of Foreign Literature and Science ,1829 **Abstract Machines** Garin Dowd, 2007 Abstract Machines Samuel Beckett and Philosophy after Deleuze and Guattari is an innovative approach to the relationship of the work of Samuel Beckett to philosophy The study seeks to combine intertextual analysis and a schizoanalytic genealogy derived from the thought of Gilles Deleuze and Felix Guattari to explore a becoming philosophy of Beckett s literary writing The author focuses on zones of encounter and confrontation spaces and times of becoming between

Beckett selected philosophers and Deleuze and Guattari In the retrospective glance occasioned by that part of Deleuze and Guattari s complex legacy which embraces their interest in the author Beckett s writing in particular effectuates a threshold hesitation which can be seen directly to impact on their approach to the history of philosophy and on their contribution to its molecularization in the name of experimentation Abstract Machines with its arresting perspectives on a wide range of Beckett s work will appeal to academics and postgraduate students interested in the philosophical echoes so evident in his writing The extent of its recourse to philosophers aside from Deleuze and Guattari including notably Alain Badiou renders it a timely and provocative intervention in contemporary debates concerning the relationship of literature to philosophy both within Beckett studies and beyond

Philosophy of Samuel Beckett John Calder,2018-01-01 ncreasingly Samuel Beckett s writing is seen as the culmination of the great literature of the twentieth century succeeding the work of Proust Joyce and Kafka Beckett is a writer whose relevance to his time and use of poetic imagery can be compared to Shakespeare s in the late Renaissance John Calder has examined the work of Beckett principally for what it has to say about our time in terms of philosophy theology and ethics and he points to aspects of his subject s thinking that others have ignored or preferred not to see Samuel Beckett s acute mind pulled apart with courage and much humour the basic assumptions and beliefs by which most people live His satire can be biting and his wit devastating He found no escape from human tragedy in the comforts we build to shield ourselves from reality even in art which for most intellectuals has replaced religion However he did develop a moral message one which is in direct contradiction to the values of ambition success acquisition and security which is normally held up for admiration and he looks at the greed God worship and cruelty to others which we increasingly take for granted in a way that is both unconventional and revolutionary If this study shocks many readers it is because the honesty the integrity and the depth of Beckett s thinking expressed through his novels plays and poetry but also through his other writings and correspondence is itself shocking to conventional thinking Yet what he has to say is also comforting He offers a different ethic and prescription for living a message based on stoic courage compassion and an ability to understand and forgive

Problem solving activities in post-editing and translation from scratch Jean Nitzke,2019 Companies and organisations are increasingly using machine translation to improve efficiency and cost effectiveness and then edit the machine translated output to create a fluent text that adheres to given text conventions This procedure is known as post editing Translation and post editing can often be categorised as problem solving activities When the translation of a source text unit is not immediately obvious to the translator or in other words if there is a hurdle between the source item and the target item the translation process can be considered problematic Conversely if there is no hurdle between the source and target texts the translation process can be considered a task solving activity and not a problem solving activity This study

investigates whether machine translated output influences problem solving effort in internet research syntax and other problem indicators and whether the effort can be linked to expertise A total of 24 translators twelve professionals and twelve semi professionals produced translations from scratch from English into German and monolingually post edited machine translation output for this study The study is part of the CRITT TPR DB database The translation and monolingual post editing sessions were recorded with an eye tracker and a keylogging program The participants were all given the same six texts two texts per task Different approaches were used to identify problematic translation units First internet research behaviour was considered as research is a distinct indicator of problematic translation units Then the focus was placed on syntactical structures in the MT output that do not adhere to the rules of the target language as I assumed that they would cause problems in the monolingual post editing tasks that would not occur in the translation from scratch task Finally problem indicators were identified via different parameters like Munit which indicates how often the participants created and modified one translation unit or the inefficiency InEff value of translation units i e the number of produced and deleted tokens divided by the final length of the translation Finally the study highlights how these parameters can be used to identify problems in the translation process data using mere keylogging data
