Summer Son English Edition:

Architecture in Britain, 1530 to 1830 John Summerson, John Newenham Summerson, Sir, 1993-01-01 The author charts the development of architectural theory and practice from Elizabeth I to George IV Questions of style technology and the social framework are resolved as separable but always essential components of the building worlds *Felony and the Guilty Mind in Medieval England* Elizabeth Papp Kamali, 2019-08 Explores the role of criminal intent in constituting felony in the first two centuries of the English criminal trial jury [The Norman Conquest in English History](#) George Garnett, 2020-12-02 The Norman Conquest in English History Volume 1 A Broken Chain pursues a central theme in English historical thinking over seven centuries Covering more than half a millennium this first volume explains how and why the experience of the Norman Conquest prompted both an unprecedented campaign in the early twelfth century to write or create the history of England and to excavate and fabricate pre Conquest English law Garnett traces the treatment of the Conquest in English historiography legal theory and practice and political argument through the middle ages and early modern period examining the dispersal of these materials from libraries after the dissolution of the monasteries and the attempts made to rescue edit and print many of them in the late sixteenth and early seventeenth centuries These preservation efforts enabled the Conquest to become still more contested in the constitutional cataclysms of the seventeenth century than it had been in the eleventh and twelfth The seventeenth century resurrection of the Conquest will be the subject of a second volume [Berthold Lubetkin's Highpoint II and the Jewish Contribution to Modern English Architecture](#) Deborah Lewittes, 2018-05-15 In 1935 the Russian born Jewish architect Berthold Lubetkin and his firm Tecton designed Highpoint a block of flats in London which Le Corbusier called revolutionary Three years later Lubetkin completed a companion design Yet Highpoint II felt very different and the sense that the ideals of modernism had been abandoned seemed hard to dispute Had modern architecture failed to take root in England This book challenges the belief that English architecture was on hiatus during the 1930s Using Highpoint II as a springboard Deborah Lewittes takes us on a journey through the defining moments of modern English architecture the high points of the period surrounding Highpoint II Drawing on Lubetkin's work and his writings the book argues that he advanced influential lasting theories which were rooted in his design for Highpoint II Lubetkin's work is explored within the context of wider Jewish emigration to London during the interwar years as well as the anti-Semitism that pervaded Britain during the 1930s As Lewittes demonstrates this decade was anything but quiet Providing a new perspective on twentieth century English architecture this book is of interest to students and scholars in architectural history urban studies Jewish studies and related fields [Articulating British Classicism](#) Elizabeth McKellar, 2017-07-05 Whereas the past decades have seen a profound reconsideration of eighteenth century visual culture the architecture of that century has undergone little evaluation Its study unlike that of the early modern period or the twentieth century has continued to use essentially the same methods and ideas over the last fifty years Articulating British Classicism reconsiders the traditional

historiography of British eighteenth century architecture as it was shaped after World War II and brings together for the first time a variety of new perspectives on British classicism in the period Drawing on current thinking about the eighteenth century from a range of disciplines the book examines such topics as social and gender identities colonialization and commercialization notions of the rural urban and suburban as well as issues of theory and historiography Canonical constructions of Georgian architecture are explored including current evaluations of the continental intellectual background the relationship with mid seventeenth century Stuart court classicism and the development of the subject in the twentieth century

Touching the City Timothy Makower, 2014-11-24 Scale in cities is relative and absolute It has the ability to make us feel at home in the world or alien from it connected or disconnected Both large and small scale in cities can be beautiful both are right neither is wrong Whilst accepting that prescription is no answer getting the scale right at an intuitive and sensual level is a fundamental part of the magic of architecture and urban design *Touching the City* explores how scale is manifested in cities exploring scale in buildings in the space between them and in their details It asks how scale makes a difference Travelling from Detroit to Chandigarh via New York London Paris Rome and Doha Tim Makower explores cities with the analytical eye of a designer and with the experiential eye of the urban dweller Looking at historic cities he asks what is good about them what can we learn from the old to inform the new The book zooms in from the macro scale of surfing Google Earth to micro moments such as finding fossils in a weathered wall It examines the dynamics and movement patterns of cities the making of streets and skylines the formation of thresholds and facades and it also touches on the process of design and the importance of drawing As the book's title *Touching the City* suggests it also emphasises the tactile that the city is indeed something physical something we can touch and be touched by alive and ever changing

The Fall and Rise of the Stately Home Peter Mandler, 1997-01-01 Challenging the prevailing view of a modern English culture besotted with its history and aristocracy Mandler portrays instead a continuously changing society where both intellectual and popular attitudes have only recently turned to admiration

The birth of modern London, 2021-02-23 The period 1660-1720 saw the foundation of modern London The city was transformed post Fire from a tight warren of medieval timber framed buildings into a vastly expanded regularised landscape of brick houses laid out in squares and spacious streets This work for the first time examines in detail the building boom and the speculative developers who created that landscape It offers a wealth of new information on their working practices the role of craftsmen and the

design thinking which led to the creation of a new prototype for English housing The book concentrates on the mass produced houses of the middling sort which saw the adoption of classicism on a large scale in this country for the first time McKellar shows however that the new city maintained a surprising degree of continuity with existing patterns of urban used and traditional architecture The book presents the late seventeenth and the early eighteenth century as a distinct phase in London s architectural development and offers a radical reinterpretations of the adoption of Renaissance styles and ideas at the level of the everyday challenging conventional interpretations of their use and reception in this country **1927**

Elizabeth Darling,2019-11-22 For the most part architectural history in Britain is the story of gradual change and evolution of long term trends that give meaning to events as they unfold even moments of apparent crescendo and climax From time to time however there comes a tipping point when old certainties are overturned new ideas break free and the clock of history is reset we call this a Year Zero This series of essays invites writers critics historians and architects to identify and reflect on a single Year Zero when the trajectories of architectural and broader history connect and coincide and the status quo is changed forever Elizabeth Darling Reader in Architectural History at Oxford Brookes University identifies 1927 as the vital year in which a British modernist avant garde was established long before the arrival of the Bauhaus *Paradise Planned*

Robert A.M. Stern,David Fishman,Jacob Tilove,2013-12-03 *Paradise Planned* is the definitive history of the development of the garden suburb a phenomenon that originated in England in the late eighteenth century was quickly adopted in the United State and northern Europe and gradually proliferated throughout the world These bucolic settings offered an ideal lifestyle typically outside the city but accessible by streetcar train and automobile Today the principles of the garden city movement are once again in play as retrofitting the suburbs has become a central issue in planning Strategies are emerging that reflect the goals of garden suburbs in creating metropolitan communities that embrace both the intensity of the city and the tranquility of nature *Paradise Planned* is the comprehensive encyclopedic record of this movement a vital contribution to architectural and planning history and an essential recourse for guiding the repair of the American townscape **A**

produces a unique vintage of hegemonic buildings that are monuments to the wealth and power of those who ruled their world This second volume presents three case studies of iconic building investment from the eighteenth century to the present day During the eighteenth century the wealth of the great landed estates funded the golden age of country house building by aristocracy and gentry During the nineteenth century the Industrial Revolution unleashed an unprecedented wave of infrastructure investment and civic building by the ascendant capitalist class Since the late twentieth century the power of global financial capital has been symbolized by the relentless rise of city centre office towers A final chapter argues that these different forms of hegemonic building are a physical manifestation of the underlying rhythm of English history
