APES in a BOX: The Review Sessions Benjamin Wood, Dave Holbert, 2013-02-01 APES in a BOX The Review Sessions is a teachers edition of our popular APES Exam study guide APES in a BOX The book is broken into 16 review lessons Each session contains student notes an AP style review quiz and teacher rubrics for quiz grading There is a bonus lesson on tips for the math portion of the exam The most exciting part of this book is that we are selling it as a BLACKLINE MASTER with a single teacher license This means that when you purchase a copy you will be free to make paper copies for all of your students The license only extends to a single teacher and their students Multiple teachers at the same school will need to buy separate copies for each teacher

**Behavioral Toxicology** Bernard Weiss, 2013-03-09 Behavioral toxicology is a young discipline in the United States so young in fact that this is one of its first books Behavioral questions are bound to play a major role in future scientific work and governmental decisions involving the health effects of environmental contaminants and other chemicals This role springs from two key problems that face scientists and public agencies required to set acceptable exposure standards or to determine criteria for the toxicity of therapeutic chemicals How do you evaluate effects that may show up only as subtle functional disturbances And how do you detect toxic effects early enough so that they may still be reversible before they produce major damage The contributions in this book come from a collection of scientists whose interests span a wide variety of problem areas The focus is largely on methodological issues because they represent the most immediate concern of the discipline We expect that this collection of papers will represent a useful source book for behavioral toxicology for some time For the past few years the University of Rochester's Department of Radiation Biology and Biophysics has sponsored a series of international conferences on chemical toxicity partly as a response to concern over the consequences to health of the rich chemical soup in which we live This book is based upon presentations made to the fifth of the series Held in June 1972 it was the first formal meeting devoted to behavioral toxicology in this country
