and cooperation in your work activities The most unique aspect of this book is that it suggests leaders use visual tools Visual Leadership is the fourth foundational element the author encourages people to practice The primary purpose of visual performance metrics isn't to make sure things are working well in your department It's to create a thinking environment that makes it easier for multiple departments teams and groups to work together It is relatively easy to come up with performance metrics for your team but what about metrics that help us to work more effectively together Good visual reporting practices create information democracy They eliminate filters that obscure knowledge between layers of management and between departments They help to create an environment that is much more robust and open making it easier to be in touch with the actual reality And perhaps the most exciting of all visual tools can help an individual learn to lead more effectively The power of using visuals in this way is underutilized in most organizations Whatever new behaviors a leader is trying to accomplish visual reporting can facilitate progress and ensure accountability in developing those new habits
