Knowledge Unplugged J. Kluge, W. Stein, T. Licht, 2001-07-27 Knowledge Unplugged announces the results of a major survey on knowledge management practice within the most influential companies in the world by the most influential management consultancy group in the world The McKinsey Knowledge Management team interviewed top executives and also investigated how far their plans were implemented in practice in 40 companies in the US Europe and Japan In many companies they discovered a significant gap between the vision at the top and the reality on the shop floor Knowledge Unplugged draws together their findings and presents a practical guide to improving knowledge building and sharing at all levels within an organisation vividly illustrated with case studies of best practice and common pitfalls It also goes further and challenges companies to abandon convention and to liberate Knowledge Management from the hands of the IT department They argue that Knowledge management is much more than simply installing a new database and can only be successful when it is at the heart of everyday personal exchanges personal incentives and personal responsibilities at every level of the firm

Advanced Functional Textiles and Polymers Shahid Ul Islam, B. S. Butola, 2019-11-12 This book on advanced functional textiles and polymers will offer a comprehensive view of cutting edge research in newly discovered areas such as flame retardant textiles antimicrobial textiles insect repellent textiles aroma textiles medical textiles smart textiles

and nano textiles etc The second part the book provides innovative fabrication strategies unique methodologies and overview of latest novel agents employed in the research and development of functional polymers Green Sustainable Process for Chemical and Environmental Engineering and Science Tariq Altalhi,Arwa Alrooqi,Inamuddin,2023-05-09 Natural Materials based Green Composites 1 Plant Fibers explores several important plant fiber based materials such as wood fibers vegetable fibers jute fibers stalk fibers and hemp fibers The book provides introductory information and various innovative applications of most important plant fiber based materials such as wood fibers vegetable fibers jute fibers stalk fibers and hemp fibers It investigates their structure and provides various innovative applications and discusses the microstructure of wood and mechanical properties of green wood based composites GWC eco friendly applications of green composites as building materials and applications in wastewater treatment The book also discusses seaweed and cotton fibers for their applications as adhesive and in reinforcement The book is complemented by Natural Materials based Green Composites 2 Biomass that deals with a broad range of material types including natural fiber reinforced polymer composites particulate composites fiberboard wood fiber composites and plywood composite that utilize natural renewable and biodegradable agricultural biomass Provides properties and applications of various biomass based polymer composite materials Covers green composites of plant origin Discusses low cost green composites of jute hemp and cotton Provides a wide spectrum applications of plant fibers Lightweight Polymer Composite Structures Sanjay Mavinkere Rangappa,Jyotishkumar Parameswaranpillai,Suchart Siengchin,Lothar Kroll,2020-09-01 This book provides a comprehensive account of developments in the area of lightweight polymer composites It encompasses design and manufacturing methods for the lightweight polymer structures various techniques and a broad spectrum of applications The book highlights fundamental research in lightweight polymer structures and integrates various aspects from synthesis to applications of these materials Features Serves as a one stop reference with contributions from leading researchers from industry academy government and private research institutions across the globe Explores all important aspects of lightweight polymer composite structures Offers an update of concepts advancements challenges and application of lightweight structures Current status trends future directions and opportunities are discussed making it friendly for both new and experienced researchers Green Hybrid Composite in Engineering and Non-Engineering Applications Tabrej Khan,Mohammad Jawaaid,2023-07-07 This book introduces the different advanced hybrid composite materials used in aerospace automotive marine and general engineering infrastructures It represents the current development processes and applications in aircraft automobile and marine structures This book also contains test cases and their validation using a finite element approach using computer tools The book also deals with the design approach for innovative hybrid composite materials focused on diverse engineering and non engineering applications A detailed review of the state of the art composite materials study presented here would be of interest to scientists academics students and engineers and professionals in general working in the field of advanced composite materials and

structures This book is also useful for Ph D research scholars to improve their fundamental understanding of advanced materials and is also suitable for master s and undergraduate courses on composite materials

Hydrothermal Behavior of Fiber- and Nanomaterial-Reinforced Polymer Composites Ramesh Kumar Nayak,Bankim Chandra Ray,Dibyaranjan Rout,Kishore Kumar Mahato,2020-04-23 Hydrothermal Behavior of Fiber and Nanomaterial Reinforced Polymer Composites provides critical information regarding the in service environmental damage and degradation studies of nano fiber reinforced polymer FRP composites focusing on hydrothermal degradation Covering hydrothermal properties of a wide range of polymer composites the book is aimed at graduate students researchers and professionals in material engineering composite materials nanomaterials and related fields

Handbook of Composites from Renewable Materials, Structure and Chemistry Vijay Kumar Thakur,Manju Kumari Thakur,Michael R. Kessler,2016-12-30 This unique multidisciplinary 8 volume set focuses on the emerging issues concerning synthesis characterization design manufacturing and various other aspects of composite materials from renewable materials and provides a shared platform for both researcher and industry The Handbook of Composites from Renewable Materials comprises a set of 8 individual volumes that brings an interdisciplinary perspective to accomplish a more detailed understanding of the interplay between the synthesis structure characterization processing applications and performance of these advanced materials The Handbook comprises 169 chapters from world renowned experts covering a multitude of natural polymers reinforcement fillers and biodegradable materials Volume 1 is solely focused on the Structure and Chemistry of renewable materials Some of the important topics include but not limited to carbon fibers from sustainable resources polylactic acid composites and composite foams based on natural fibres composites materials from other than cellulosic resources microcrystalline cellulose and related polymer composites tannin based foam renewable feedstock vanillin derived polymer and composites silk biocomposites bioderived adhesives and matrix polymers biomass based formaldehyde free bioresin isolation and characterization of water soluble polysaccharide biobased fillers keratin based materials in biotechnology structure of proteins adsorbed onto bioactive glasses for sustainable composite effect of filler properties on the antioxidant response of starch composites composite of chitosan and its derivate magnetic biochar from discarded agricultural biomass biodegradable polymers for protein and peptide conjugation polyurethanes and polyurethane composites from biobased recycled components

Polypropylene-Based Biocomposites and Bionanocomposites Visakh P. M.,Matheus Poletto,2017-12-18 This book discusses new developments in an up to date coherent and objective set of chapters by eminent researchers in the area of polypropylene based biocomposites and bionanocomposites It covers biomaterials such as cellulose chitin starch soy protein hemicelluloses polylactic acid and polyhydroxyalkanoates Other important topics such as hybrid biocomposites and bionanocomposites of polypropylene biodegradation study of polypropylene based biocomposites and bionanocomposites polypropylene based bionanocomposites for packaging applications polypropylene based carbon nanomaterials reinforced nanocomposites degradation and flame

retardency of polypropylene based composites and nanocomposites are covered as well Encyclopedia of Renewable and Sustainable Materials ,2020-01-09 Encyclopedia of Renewable and Sustainable Materials Five Volume Set provides a comprehensive overview covering research and development on all aspects of renewable recyclable and sustainable materials The use of renewable and sustainable materials in building construction the automotive sector energy textiles and others can create markets for agricultural products and additional revenue streams for farmers as well as significantly reduce carbon dioxide CO2 emissions manufacturing energy requirements manufacturing costs and waste This book provides researchers students and professionals in materials science and engineering with tactics and information as they face increasingly complex challenges around the development selection and use of construction and manufacturing materials Covers a broad range of topics not available elsewhere in one resource Arranged thematically for ease of navigation Discusses key features on processing use application and the environmental benefits of renewable and sustainable materials Contains a special focus on sustainability that will lead to the reduction of carbon emissions and enhance protection of the natural environment with regard to sustainable materials *My Other Wife Is a Car* John M. Wright,2010-10 Strap yourself in for a light hearted and passionate celebration of 30 years of driving the best and worst cars the biggest lies the most glorious failures the cars that got away and what it feels like to go full throttle for the first time through the kink into Caltex Chase This book is about the passion of life in the fast lane *Designing with Natural Materials* Graham A. Ormondroyd,Angela F. Morris,2018-09-03 In a world now forced to address the issues of sustainability environmental impact and the widespread pollution of land and oceans with manmade materials alternative resources must be considered for the future of the planet A vast array of natural materials is available throughout the world with properties that are often superior to the man made alternatives Designing with Natural Materials fills the gap between the current scientific knowledge of the use of natural materials and product design and acts as a bridge between the two disciplines The book serves as an introduction to natural materials within the context of design The chapters include case studies research and a historical perspective It develops ideas of designing with natural materials in specific areas and looks to the future of new biobased materials and how these will influence design The work offers insight to designers of biobased materials across a range of different design disciplines while also providing insights to scientists on the process of design production and the needs of a material beyond those traditionally analyzed in the laboratory The final chapters touch on the use of bioinspiration and biomimicry in the development and use of biobased materials and how natural design will influence both material design and products in the future The book will be of interest to engineers scientific researchers professional designers students those working in industry who are considering using natural materials as an alternative to current unsustainable options and anyone who has an interest in the subject Emerging Applications of Nanomaterials N.B. Singh,Md. Abu Bin Hasan Susan,Ratiram Gomaji Chaudhary,2023-03-05 This book reviews new advances in the field of nanomaterials their synthesis

characterization and applications Specific topics include nanomaterials as catalysts photodegradation of organic pollutants multifunctional textiles self healing hydrogels nanosensors for the detection of pathogens machine learning based prosthesis and various applications in the sports industry the automobile sector the area of defence and security pharmaceuticals energy storage and food packaging Keywords Nanomaterials Catalysts Photodegradation Organic Pollutants Multifunctional Textiles Self Healing Hydrogels Nanosensors Detection of Pathogens Prosthesis Pharmaceuticals Energy Storage Food Packaging
