Stephen S. Roberts,2021-10-31 This outstanding book will be essential for future studies of naval policy in the period  
between la Gloire and the Great War The Naval Review This book is the first comprehensive listing in English of more than  
1400 warships that were added to the official French navy fleet list between 1 January 1859 and World War I It includes  
everything from the largest battleships to a small armoured gunboat that looked like a floating egg Reflecting the main  
phases of naval policy the ships are listed in three separate parts to keep contemporary designs together and then by ship  
type and class For each class the book provides a design history explaining why the ships were built substantial technical  
characteristics for the ships as completed and after major reconstructions and selected career milestones including the  
ultimate fate of each ship Following the earlier volumes written jointly with Rif Winfield French Warships in the Age of Sail  
1626 1786 and French Warships in the Age of Sail 1786 1861 this trilogy now provides a complete picture of the  
development of French warships over a period of almost three centuries As a technical reference on the French ships of 1859  
to 1914 this book is a must for the serious naval architecture student modeler or enthusiast So much solid information is  
packed in this book arranged logically clearly and with so many illustrations I cannot see where another volume on this  
subject can compete Highly recommended Nautical Research Journal Superlatives abound in describing this book arguably  
the finest naval shiplist ever created Warship International
