**SOAP FORMAT**

**S - Subjective**

Patient states facts that support the focus of the session. Brief statements reported by the patient may be used, as well as paraphrased statements.

Client reported feeling depressed, but not suicidal, since his bike accident and stated "I didn't care if I was sad with the pain or crash." He stated, "I don't believe in treatment, but I'll give it a try as long as I have help with the cravings." He reported being fearful of relapse due to strong cravings, but stated "I feel better being on Suboxone, it makes the cravings more manageable." He reported residual pain from his bike accident.

**O - Objective**

Observable data or information supporting the subjective statements. This may include the physical appearance of the patient (e.g., weight, clarity, comfortable, disheveled, well-groomed, well-maintained, etc.) signs, results of completed lab/diagnostic test, and medications the patient is currently taking or being prescribed.

Client was withdrawn and guarded. He participated in group therapy and engaged in the group process with the help of the counselor. He was able to identify two "triggers," such as "seeing the scene from my accident" and "being around other people who use stuff." Withdrawn symptoms have resolved, however, he still has strong cravings despite improvement since starting Suboxone.

**A - Assessment**

The counselor's or clinician's assessment of the situation, the session, and the patient's condition, progress, response to intervention, and progress in achieving treatment plan goals/objectives. This may also include the diagnosis with a list of symptoms and information used in differential diagnosis.

Opioid use: post-withdrawal. Overall, Mr. Doe appears engaged in SUD treatment at this time. He still has strong cravings and is fearful of relapse, but appears to be responding to Suboxone. Unclear if higher dose is necessary – will coordinate with Suboxone prescriber. He continues to report depressive and pain symptoms and would benefit from further mental and physical health follow up, respectively.

**P - Plan**

The treatment plan/next forward, based on the clinical information reported and the assessment.

**Substance Use**

- Client will continue DOP and MAT as prescribed. He agreed to attend at least 1 Narcotics Anonymous meeting at least 1x per week. Continue Suboxone and coordinating with Suboxone prescriber.

- Counselor will refer the client to case management for help with housing and employment. Mental Health

- Given ongoing depressive symptoms, will refer for mental health assessment.

**Physical Health**

- Client will call his PCP to make an appointment by next week.

- Refer to case management to Cx to ensure the client made PCP appointment.

Drugs Great Britain: Parliament: House of Commons: Home Affairs Committee, 2012-12-10 Whilst it supported a number of steps the Government has taken in its 2010 drug strategy it believes more needs to be done to comprehensively address the drugs problem in the UK The report focuses on the need to break the cycle of drug addiction and highlights in

particular the need for improved treatment in prisons and wider society and for early intervention with better education and preventative work Three key areas were covered prisons treatment and the calling for the establishment of a Royal Commission into the issues The Committee was disturbed to find that almost a quarter of prisoners found it easy to get drugs in prison and recommended that measures such as regular random drug tests based on suspicion be increased It was concerned that the Government's policy of recovery was not being implemented in particular that drug rehabilitation in prison was undermined by the lack of support for offenders on release and did not take into account prescription drug addiction The Committee is also concerned that the goal of retaining addicts in treatment has precluded attempts at recovery It supported the Government's objective of recovery but noted that this will require a range of treatment options with each individual needing a tailored treatment plan The Committee highlighted residential rehabilitation and the use of buprenorphine as an alternative to methadone as two treatment methods which were currently under utilised Treatment must also be supplemented by housing training and employment support if required

**The Clinic and Elsewhere** Todd Meyers, 2013-05-15 Despite increasingly nuanced understandings of the neurobiology of addiction and a greater appreciation of the social and economic conditions that allow drug dependency to persist there remain many unknowns regarding the individual experience of substance abuse and its treatment In recent years novel pharmaceutical therapies have given rise to both new hopes for recovery and renewed fears about drug diversion and abuse In The Clinic and Elsewhere Todd Meyers looks at the problems of meaning caused by drug dependency and appraises the changing terms of medical intervention today By following a group of adolescents from the time they enter drug rehabilitation treatment through their reentry into the outside world the clinic their homes and neighborhoods and other institutional settings Meyers traces patterns of life that become mediated by pharmaceutical intervention His focus is not on the drug economy but rather on the therapeutic economy where new markets transactions of care and highly porous conceptions of success and failure come together to shape addiction and recovery The book is at once a meditative work of anthropology a demonstration of the

theoretical and methodological limits of medical research and a forceful intervention into the philosophy of therapeutics at the level of the individual Watch the trailer <http://www.youtube.com/watch?v=Nfy21fxp8list> UUge4MONgLFncQ1w1C\_BnHcw index 12 feature plc Practical Psychology in Medical Rehabilitation Maggi A.
