**The Law of Subsidies Under the GATT/WTO System** Marc Benitah, 2001-11-12 This work on the law of subsidies has been long awaited by many actors in international trade With its introduction of the concept of attenuation of entitlement Marc Benitah's utterly new analysis alters our understanding of the international economic law of subsidies and its future invocation and jurisprudence forever The issue of subsidies is arguably the predominant theme at this moment in international economic law and a consistent approach to the legal treatment of subsidies is urgently needed In Professor Benitah's view the answer lies in the recognition that entitlements granted to a party seeking to defend itself against the adverse effects of subsidies must be attenuated in order to avoid undesirable economic and social consequences In the various techniques of attenuation thoroughly described and analyzed in this book may be found the unifying thread on which a logical coherent law of subsidies may be strung Why techniques of attenuation are intimately linked to the birth of past and future legal disputes relating to subsidies Why significant techniques of attenuation e g taking into account the positive impact of a subsidy on consumers have not arisen in the GATT WTO context Why much recent theoretical debate on the concept of distortion has not led to a breakthrough in the law of subsidies Why attenuations favouring developing countries are surprisingly legally vulnerable in practice Why deliberate recourse to techniques of attenuation necessitates their continuing clarification through a case law process By referring to the legal materials of both the GATT 1947 and the WTO systems at each point in his demonstration Professor Benitah lays a substantial groundwork for determining innovative WTO norms
