Saint Hysteria Cristina Mazzoni, 1996 Saint Hysteria examines scientific literary and religious texts that share a fascination with the otherness of the female body whether in ecstatic pleasure or in neurotic pain Cristina Mazzoni focuses on material from the late nineteenth and early twentieth centuries mainly in Italy and France Her approach uses the methodologies of cultural studies and feminism but also benefits from the insights of psychoanalytic criticism She asks how the identification of mysticism with hysteria became prevalent and explores the continuing dialogue between a historicizing view of hysteria and a view of hysteria as repressed religious mysticism According to Mazzoni this dialogue is discernible at various levels and in a variety of discourses The medical history of hysteria she maintains is often linked to the religious history of supernatural phenomena and the medical discourse of positivism depends on the religious feminine element that it attempts to repress Similarly she finds a continuity between the literature of naturalism and that of decadence in their representations of the interdependence of neurosis and religion Finally the religious writings of women mystics and the discourses they inspired reveal an unresolved tension between nature and supernature body and soul or psyche which Mazzoni suggests mirrors and complicates the very issues raised by hysterical conversion Among those whose views she considers are the writers Jules and Edmond de Goncourt Gabriele d Annunzio and Antonio Fogazzaro as well as Graham Greene and Simone Weil the mystics Angela of Foligno Gemma Galgani and Teresa of Avila and the theorists Jean Martin Charcot Cesare Lombroso Jacques Lacan Simone de Beauvoir Julia Kristeva and Luce Irigaray

The Cambridge Illustrated History of Warfare Geoffrey Parker, 2021-08-05 The new edition of The Cambridge Illustrated History of Warfare offers an updated comprehensive account of Western warfare from its origins in Classical Greece and Rome through the Middle Ages and the early modern period down to the wars of the twenty first century in Afghanistan Iraq and Syria

The Roman Navy Michael Pitassi, 2012-05-11 The Roman Navy was remarkable for its size reach and longevity As

significant as the Royal Navy was to the British Empire in the nineteenth century the Roman Navy was crucial to the extraordinary expansion of Imperial power and for its maintenance over a period of more than 800 years The fabric and organisation of this maritime force is at the core of this new book At the height of its power the Roman Navy was at least in numerical terms the largest maritime force ever to have existed It employed tens of thousands of sailors and maintained and fought fleets of ships larger than any forces since In these pages the author looks at all the aspects of the Navy in turn Shipbuilding rigs and fittings and shipboard weaponry are covered as are all the principal ship from the earliest types to the very last The command structure is outlined as are all aspects of the crews lives their recruitment terms of service training and uniforms Life onboard food and drink discipline religion and superstition are described while seamanship and navigation are dealt with along with bases and shore establishments Operations feature prominently the allied and enemy navies compared and specimen battles employed to explain fighting tactics All these aspects changed and developed hugely over the great span of the Roman empire but this fascinating book brings this complex story together in one brilliant volume

Environmental Problems of the Greeks and Romans Johnson Donald Hughes, 2014-02-15 How did ancient societies change the environment and how do their actions continue to affect us today In this dramatically revised and expanded second edition of the work entitled *Pan s Travail* J Donald Hughes examines the environmental history of the classical period and argues that the decline of ancient civilizations resulted in part from their exploitation of the natural world Focusing on Greece and Rome as well as areas subject to their influences Hughes offers a detailed look at the impact of humans and their technologies on the ecology of the Mediterranean basin Evidence of deforestation in ancient Greece the remains of Roman aqueducts and mines and paintings on centuries old pottery that depict agricultural activities document ancient actions that resulted in detrimental consequences to the environment Hughes compares the ancient world s environmental problems to other persistent social problems and discusses attitudes toward nature expressed in Greek and Latin literature In addition to extensive revisions based on the latest research this new edition includes photographs from Hughes s worldwide excursions a new chapter on warfare and the environment and an updated bibliography Acts and Romans I-VIII James Hastings, 1911

The Great Texts of the Bible: Acts and Romans I-VIII James Hastings, 1911 **A Dictionary of the Bible: Extra volume, containing articles, indexes and maps** James Hastings, John Alexander Selbie, Andrew Bruce Davidson, Samuel Rolles Driver, Henry Barclay Swete, 1905 **The Mythology of All Races ...** Louis Herbert Gray, George Foot Moore, John Arnott MacCulloch, 1916 **Economic Expansion in the Byzantine Empire, 900-1200** Alan Harvey, 2003-10-30 In this book Dr Harvey shows that if we broaden our comprehension of feudalism the economic developments of the Byzantine Empire and of the medieval west were far more comparable than Byzantine historians have been prepared to admit Previous interpretations have linked economic trends too closely to the political fortunes of the state and have consequently regarded the twelfth century as a period of economic stagnation Yet there is considerable evidence that the empire s population

expanded steadily during the period covered by this book and that agricultural production was intensified A wealth of evidence serves to reinforce the point that the disintegration of the empire in the late twelfth century should no longer be associated with economic decline Dr Harvey s conclusions in particular that there is no incompatibility between the development of the landed wealth of a feudalising aristocracy and the growth of commerce and urbanisation will affect all future interpretations of Byzantine history

Archaeology and the Social History of Ships Richard A. Gould, 2000-04-13 Maritime archaeology deals with shipwrecks and is carried out by divers rather than diggers But this is by no means a marginal branch of archaeology It embraces maritime history analysing changes in ship building navigation reconstructing the infrastructure of waterborne commerce and offers fresh perspectives on the cultures and societies that produced the ships and sailors Drawing on detailed and recent case studies Richard Gould provides an up to date review of the field and a clear exposition of new developments in undersea technologies He also argues for the careful management of underwater cultural resources
