why innovation in mobility practices takes place or not *High Noon in the Automotive Industry* Helmut Becker, 2006-02-10 This book was born from curiosity To begin with it was the curiosity of an economist who studied in the 60 s in an environment which has subsequently developed from national into global economics Who has to recognize that politicians scholars and large segments of society oblivious to supranational authorities and economic globalization forces continue to labour under the notion that they are still fully autonomous and sovereign when shaping national economic policy And pretend as though their own national state were still the master in its own house that despite unbridled market economics could continue to dictate to the economy and companies how to live and in which rooms All that has become fiction The laws of globalization diminish the manoeuvring space for shaping national economic policy Even if many folks today don't want to hear it The issue is no longer achieving what is socially politically desirable for the own society but rather the optimal adaptation of society and social benefits to the politically practicable *International Marketing* Sak Onkvisit, John Shaw, 2009-05-07 A key text examining the theory and strategy of marketing in a global context this acclaimed text uses academic rigour rather than anecdotal evidence The new edition features key new data updated case studies and a revised companion website *The Second Automobile Revolution* M. Freyssenet, 2009-04-30 The rapid takeoff of the continent sized national economies and the increasing expense of extraction have led to strong tensions in petrol prices and a race towards alternative driving systems This book analyses the emergence of a second automobile revolution through the trajectories of automobile firms since the nineties *Бизнес-журнал*, 2007/09 Бизнес-журнал.
