Low-rank Coals for Power Generation, Fuel and Chemical Production Zhongyang Luo,Michalis Agraniotis,2017-06-22 Low Rank Coals for Power Generation Fuel and Chemical Production provides a thorough introduction to lignite brown coal and subbituminous coals and explores how they can be used efficiently and economically in place of hard coal The book examines the undesirable characteristics of low quality coals such as high moisture content low calorific value and aggressive ash characteristics and the resulting refinements to standard technologies and practices required for successful combustion gasification and pyrolysis The first part of this book provides a comprehensive and systematic review of the properties of low rank coals and corresponding preparation methods

such as drying cleaning and upgrading Power generation from low rank coals is the focus of Part 2 with chapter topics ranging from high efficiency pulverized coal combustion and circulating fluidized bed combustion to emerging areas such as chemical looping and oxyfuel combustion The final contributions address the important subjects of coal to liquids polygeneration and coke production using low rank coals as well as the critical issue of carbon capture and storage This book is a valuable resource for power generation engineers and researchers seeking to maximize the opportunities provided by these cheaper coal feedstocks for efficient and environmentally compatible power generation Presents the most in depth treatment of low rank coals available Addresses both power generation and fuel production Includes coverage that spans pulverized coal combustion and emerging technologies such as CFBC UCG CLC and oxyfuel combustion Habitat, Population Dynamics, and Metal Levels in Colonial Waterbirds Joanna Burger, Michael Gochfeld, 2016-07-06 This book is a result of the authors more than 40 years of study on the behavior populations and heavy metals in the colonial waterbirds nesting in Barnegat Bay and the nearby estuaries and bays in the Northeastern United States From Boston Harbor to the Chesapeake based on longitudinal studies of colonial waterbirds it provides a clear picture **Plant Biodiversity** Abid A Ansari, Sarvajeet Singh Gill, Zahid Khorshid Abbas, M Naeem, 2016-12-23 Results of regular monitoring of the species diversity and structure of plant communities is used by conservation biologists to help understand impacts of perturbations caused by humans and other environmental factors on ecosystems worldwide Changes in plant communities can for example be a reflection of increased levels of pollution a response to long term climate change or the result of shifts in land use practices by the human population This book presents a series of essays on the application of plant biodiversity monitoring and assessment to help prevent species extinction ecosystem collapse and solve problems in biodiversity conservation It has been written by a large international team of researchers and uses case studies and examples from all over the world and from a broad range of terrestrial and aquatic ecosystems The book is aimed at any graduate students and researchers with a strong interest in plant biodiversity monitoring and assessment plant community ecology biodiversity conservation and the environmental impacts of human activities on ecosystems **Mineral Resources, Economics and the Environment** Stephen E. Kesler, Adam F. Simon, 2015-10-26 Written for students and professionals this revised textbook surveys the mineral industry from geological environmental and economic perspectives Thoroughly updated the text includes a new chapter on technology industry metals as well as separate chapters on mineral economics and environmental geochemistry Carefully designed figures simplify difficult concepts and show the location of important deposits and trade patterns emphasising the true global nature of mineral resources Featuring boxes highlighting special interest topics the text equips students with the skills they need to contribute to the energy and mineral questions currently facing society including issues regarding oil pipelines nuclear power plants water availability and new mining locations Technical terms are highlighted when first used and references are included to allow students to delve more deeply into areas of interest Multiple choice and

Materials for Food Packaging Giuseppe Cirillo, Marek A. Kozłowski, Umile Gianfranco Spizzirri, 2018-05-04 The novel insights as well as the main drawbacks of each engineered composites material is extensively evaluated taking into account the strong relationship between packaging materials environmental and reusability concerns food quality and nutritional value Composites by matching the properties of different components allow the development of innovative and performing strategies for intelligent food packaging thus overcoming the limitations of using only a single material The book starts with the description of montmorillonite and halloysite composites subsequently moving to metal based materials with special emphasis on silver zinc silicium and iron After the discussion about how the biological influences of such materials can affect the performance of packaging the investigation of superior properties of sp² carbon nanostructures is reported Here carbon nanotubes and graphene are described as starting points for the preparation of highly engineered composites able to promote the enhancement of shelf life by virtue of their mechanical and electrical features Finally in the effort to find innovative composites the applicability of biodegradable materials from both natural e.g cellulose and synthetic e.g polylactic acid PLA origins with the aim to prove that polymer based materials can overcome some key limitations such as environmental impact and waste disposal Greening Death Suzanne Kelly, 2015-09-01 We once disposed of our dead in earth friendly ways no chemicals biodegradable containers dust to dust But over the last 150 years death care has become a toxic polluting and alienating industry in the United States Today people are slowly waking up to the possibility of more sustainable and less disaffecting death care reclaiming old practices in new ways in a new age Greening Death traces the philosophical and historical backstory to this awakening captures the passionate on the ground work of the Green Burial Movement and explores the obstacles and other challenges getting in the way of more robust mobilization As the movement lays claim to greener simpler and more cost efficient practices something even more promising is being offered up a tangible way of restoring our relationship to nature *Stable Isotope Geochemistry* Jochen Hoefs, 2021-10-08 This classic textbook is an introduction to the systematics and the use of stable isotopes in geosciences It is subdivided into three parts i theoretical and experimental principles ii fractionation processes of light and heavy elements iii the natural variations of geologically important reservoirs Since the publication of the previous edition improvements in multi collector ICP mass spectrometry have increased the ability to measure isotope ratios with very high precision for many elements of the periodic table The amount of published data has increased tremendously in the last years thus conclusions based on a limited database are now better constrained In this new edition therefore 47 elements with resolvable natural variations in isotope composition are discussed This increase of elements together with advances in the calculation of equilibrium isotope fractionation using ab initio methods has led to an unbelievable rise of publications making substantial major revisions and extensions of the last
