Web and Communication Technologies and Internet-Related Social Issues - HSI 2005 Shinji Shimojo, Shingo Ichii, Tok Wang Ling, Kwan-Ho Song, 2005-08-25 The Internet has now become an integral part of everyday life for hundreds of millions of people around the world. The uses of the Internet have augmented commerce, communication, education, governance, entertainment, health care, etc. E-mail has become an indispensable part of life; the Web has become an indispensable source of information on just about everything people now use. Government websites to receive instructions and information and to do paperwork with the government. Many major online businesses have been created such as Amazon, eBay, Google, Travelocity, eTrade, etc. However, the uses of the Internet have also had serious negative effects including spam, the spreading of viruses and worms, spyware, phishing, hacking, online fraud, invasions of privacy, etc. Viruses and worms often bring down tens of millions of computers around the world. Many people get duped into furnishing their personal identifications and bank and insurance account information, etc. Hackers break into government and corporation computers to steal critical data. Unsubstantiated rumors about individuals or organizations spread like wildfire on the Internet, etc. Further, the uses of the Internet are creating new paradigms in areas such as copyright, governance, etc. The widespread use of peer-to-peer file sharing systems started by Napster is forcing a reassessment of the value of holding copyright on digital media. Internet postings by vocal citizens to the Web sites of the news media, government offices, and elected government officials are impacting government policies and swaying the opinions of other citizens.
