Operational Reservations: Considerations for a Total Army Force John D. Ellis, Laura McKnight MacKenzie, 2014-07-28 Drawdowns in Army funding and in the overall numbers of Soldiers have called attention to the right sizing of the three Armies the Active Component the Army Reserve and the Army National Guard As senior leaders of all three components weigh the various options and discuss the merits of an Operational Reserve it is important that they and civilian policymakers consider the necessary reforms that might have impact on implementing the Army Total Force Policy directed by the Secretary of the Army The authors examine the tenets of the Army Total Force Policy the details of what exactly the term Operational Reserve means and the potential obstacles that are currently in place to disrupt successful reform The monograph includes questions for senior leader policy considerations examples of potential concerns and recommendations to help mitigate obstacles in achieving a suitable and workable Total Army end state Operational Reservations John D. Ellis, Laura McKnight MacKenzie, 2014 As the Army Reserve Components the Army Reserve and the Army National Guard assume an operational mission as the force drawdowns in overseas contingency operations occur the Army senior military and civilian leadership should consider the ramifications and realities of such a mission in what is expected to be a relatively peaceful time This monograph explores some of these considerations regarding the implementation of the Army Total Force Policy identifies potential obstacles and makes recommendations to better engage the three Armies in a successful and meaningful reform effort Throughout the authors call for significant cultural shifts in thinking about how the Reserve Components are used and integrated into a Total Force **Operational Reservations** U. O'Hanlon, 2015-08-31 What happens if we bet too heavily on unmanned systems cyber warfare and special operations in our defense In today's U S defense policy debates big land wars are out Drones cyber weapons special forces and space weapons are in Accordingly Pentagon budget cuts have honed in on the army and ground forces this after the long wars in Iraq and Afghanistan seems like an appealing idea No one really wants American boots on the ground in bloody conflicts abroad But it is not so easy to simply declare an end to messy land wars A survey of the world's trouble spots suggests that land warfare has more of a future than many now seem to believe In *The Future of Land Warfare* Michael O Hanlon offers an analysis of

the future of the world's ground forces Where are large scale conflicts or other catastrophes most plausible Which of these could be important enough to require the option of a U S military response And which of these could in turn demand significant numbers of American ground forces in their resolution O Hanlon is not predicting or advocating big American roles in such operations only cautioning against overconfidence that we can and will avoid them O Hanlon considers a number of illustrative scenarios in which large conventional forces may be necessary discouraging Russia from even contemplating attacks against the Baltic states discouraging China from considering an unfriendly future role on the Korean peninsula handling an asymmetric threat in the South China Sea with the construction and protection of a number of bases in the Philippines and elsewhere managing the aftermath of a major and complex humanitarian disaster superimposed on a security crisis perhaps in South Asia coping with a severe Ebola outbreak not in the small states of West Africa but in Nigeria at the same time that country falls further into violence addressing a further meltdown in security conditions in Central America
