Money Changes Everything William N. Goetzmann, 2017-08-15 A magnificent history of money and finance New York Times Book Review Convincingly makes the case that finance is a change maker of change makers Financial Times In the aftermath of recent financial crises it's easy to see finance as a wrecking ball something that destroys fortunes and jobs and undermines governments and banks In Money Changes Everything leading financial historian William Goetzmann argues the exact opposite that the development of finance has made the growth of civilizations possible Goetzmann explains that finance is a time machine a technology that allows us to move value forward and backward through time and that this innovation has changed the very way we think about and plan for the future He shows how finance was present at key moments in history driving the invention of writing in ancient Mesopotamia spurring the classical civilizations of Greece and Rome to become great empires determining the rise and fall of dynasties in imperial China and underwriting the trade expeditions that led Europeans to the New World He also demonstrates how the apparatus we associate with a modern economy stock markets lines of credit complex financial products and international trade were repeatedly developed forgotten and reinvented over the course of human history Exploring the critical role of finance over the millennia and around the world Goetzmann details how wondrous financial technologies and institutions money bonds banks corporations and more have helped urban centers to expand and cultures to flourish And it's not done reshaping our lives as Goetzmann considers the challenges we face in the future such as how to use the power of finance to care for an aging and expanding population Money Changes Everything presents a fascinating look into the way that finance has steered the course of history

Daughters of Hecate Kimberly B. Stratton, Dayna S. Kalleres, 2014-10-01 Daughters of Hecate unites for the first time research on the problem of gender and magic in three ancient Mediterranean societies early Judaism Christianity and Graeco Roman culture The book illuminates the gendering of ancient magic by approaching the topic from three distinct disciplinary perspectives literary stereotyping the social application of magic discourse and material culture The authors probe the foundations of processes and motivations behind gendered stereotypes beginning with Western culture's earliest associations of women and magic in the Bible and Homer's Odyssey Daughters of Hecate provides a nuanced exploration of the topic while avoiding reductive approaches In fact the essays in this volume uncover complexities and counter discourses that challenge rather than reaffirm many gendered stereotypes taken for granted and reified by most modern scholarship By combining critical theoretical methods with research into literary and material evidence Daughters of Hecate interrogates a false association that has
