 Performance problems are rarely problems per se. They are more often crises during which you're pressured for results by a manager standing outside your cubicle while your phone rings with queries from the help desk. You won't have the time for a leisurely perusal of the manuals nor to lean back and read a book on theory. What you need in that situation is a book of solutions, and solutions are precisely what *Oracle Database 11g Performance Tuning Recipes* delivers. *Oracle Database 11g Performance Tuning Recipes* is a ready reference for database administrators in need of immediate help with performance issues relating to Oracle Database. The book takes an example-based approach wherein each chapter covers a specific problem domain. Within each chapter are recipes showing by example how to perform common tasks in that chapter's domain. Solutions in the recipes are backed by clear explanations of background and theory from the author team. Whatever the task if it's performance-related you'll probably find a recipe and a solution in this book. Provides proven solutions to real life Oracle performance problems. Offers relevant background and theory to support each solution. Written by a team of experienced database administrators successful in their careers. **Oracle Tuning** Donald K. Burleson, 2010 For Oracle tuning professionals wishing to add more tools to their Oracle tuning toolbox, this guidebook introduces the various tuning analytical tools and helpful strategies to make the database easier to use.
