**James Clerk Maxwell**

## **Physical Science Paper Scope:**

**The Scientific Letters and Papers of James Clerk Maxwell: Volume 1, 1846-1862** James Clerk Maxwell, 1990-10-26  
This is a comprehensive edition of Maxwell's manuscript papers published virtually complete and largely for the first time. Maxwell's work was of central importance in establishing and developing the major themes of the physics of the nineteenth century: his theory of the electromagnetic field and the electromagnetic theory of light and his special place in the history of physics. His fecundity of imagination and the sophistication of his examination of the foundations of physics give particular interest and importance to his writings. Volume I 1846-1862 documents Maxwell's education and early scientific work and his major period of scientific innovation: his first formulation of field theory, the electromagnetic theory of light and the statistical theory of gases. Important letters and manuscript drafts illuminate this fundamental early work and the volume includes his letters to friends and family, general essays and lectures and juvenilia. *NASA Tech Briefs*, 2007 *UPTET Teacher Selection Paper-1 for Class 1 to 5 2020* Arihant Experts, Teaching is one of the oldest and most respected professions; it molds the fragile minds into strong independent decision makers.
