doctrine for the benefit of all sustainment personnel *Smithells Metals Reference Book* William F. Gale, Terry C. Totemeier, 2003-12-09 Smithells is the only single volume work which provides data on all key aspects of metallic materials. Smithells has been in continuous publication for over 50 years. This 8th Edition represents a major revision. Four new chapters have been added for this edition; these focus on Non conventional and emerging materials: metallic foams, amorphous metals, including bulk metallic glasses, structural intermetallic compounds, and micro/nano scale materials. Techniques for the modelling and simulation of metallic materials. Supporting technologies for the processing of metals and alloys. An Extensive bibliography of selected sources of further metallurgical information including books, journals, conference series, professional societies, metallurgical databases, and specialist search tools. One of the best known and most trusted sources of reference since its first publication more than 50 years ago. The only single volume containing all the data needed by researchers and professional metallurgists. Fully updated to the latest revisions of international standards. *GRC Technology Solutions (OCEG Blue Book)* Scott Mitchell, 2013-05-06 The GRC Technology Solutions guide is a model of typical areas where technology is implemented to enhance and enable GRC processes across the organization. It is not intended to include every functionality and capability but to help the IT and business users of the Guide understand at a high level the technology that is available, prioritize the needs of their organization, and start the solution selection process. That selection should always be within the context of the organization's overall IT infrastructure strategy. OCEG will update the Guide on a periodic basis to reflect advances in technology and its use. With an understanding of these relationships, owners of GRC processes and Information Technology professionals can use the Guide to better understand and enable technology support for GRC processes. *Glocalized Solutions for Sustainability in Manufacturing* Jürgen Hesselbach, Christoph Herrmann, 2011-03-19 The 18th CIRP International Conference on Life Cycle Engineering (LCE) 2011 continues a long tradition of scientific meetings focusing on the exchange of industrial and academic knowledge and experiences in life cycle assessment, product development, sustainable manufacturing, and end of life management. The theme 'Glocalized Solutions for Sustainability in Manufacturing' addresses the need for engineers to develop solutions which have the potential to address global challenges by providing products, services, and processes taking into account local capabilities and constraints to achieve an economically, socially, and environmentally sustainable society in a global perspective. 'Glocalized Solutions for Sustainability in Manufacturing' do not only involve products or services that are changed for a local market by simple substitution or the omitting of functions. Products and services need to be addressed that ensure a high standard of living everywhere. Resources required for manufacturing and use of such products are limited and not evenly distributed in the world. Locally available resources, local capabilities, as well as local constraints have to be drivers for product and process innovations with respect to the entire life cycle. The 18th CIRP International Conference on Life Cycle Engineering (LCE) 2011 serves as a platform for the discussion of the resulting challenges and the collaborative development of new scientific ideas.
