## CHAPTER 05 STRATEGIC CAPACITY PLANNING FOR PRODUCTS AND SERVICES

### Teaching Notes

Capacity is an upper bound on the load that a facility or a plant can serve or manufacture. We measure the capacity of a plant, machine department, worker, hospital, etc., in terms of output (number of units or number of pounds manufactured) or in terms of input (number of machine hours or machines needed to satisfy demand).

Capacity planning refers to the activities of the firm in determining the capacity of a plant or a facility in terms of equipment, machines, space, workers, and processes based on the resource constraints of the facility. In other words, a major function of capacity planning is to match the capacity of the machine or facility with the demand for the products of the firm.

Capacity planning can be classified into three planning horizons:

1. Long-range
2. Medium-range
3. Short-range
