

A customer opinion program was conducted by Company EWF. Then, the results were analyzed and presented with the help of bar chart, Pareto chart and cause-and-effect diagram.

a.

The Bar Chart for EWF's customer satisfaction survey is as below:

From the bar chart of customer satisfaction, it can be concluded that half of the customers were facing the problem related to "needed to return to correct the problem".

Apart from this, price and service delay were major failures of the company. Problems related to unfriendly atmosphere and incorrect billing were comparatively lesser in numbers.

The Pareto Chart for EWF's customer satisfaction survey is as below:

From the Pareto chart, it can be concluded that the company's service lacked the following areas:

- 1) Customers were not satisfied with the quality of product. They needed to return it after purchase, for repairing. Every second customer faced the same problem.
- 2) The customers feel that service price charged by the company is too high.
- 3) Service delivery of the company is very slow.

Mehdi,2006-03-31 Administration r f rence lectronique **Construct, Merge, Solve & Adapt** Christian Blum,2024-06-18 This book describes a general hybrid metaheuristic for combinatorial optimization labeled Construct Merge Solve Adapt CMSA The general idea of standard CMSA is the following one At each iteration a number of valid solutions to the tackled problem instance are generated in a probabilistic way Hereby each of these solutions is composed of a set of solution components The components found in the generated solutions are then added to an initially empty sub instance Next an exact solver is applied in order to compute the best solution of the sub instance which is then used to update the sub instance provided as input for the next iteration In this way the power of exact solvers can be exploited for solving problem instances much too large for a standalone application of the solver Important research lines on CMSA from recent years are covered in this book After an introductory chapter about standard CMSA subsequent chapters cover a self adaptive CMSA variant as well as a variant equipped with a learning component for improving the quality of the generated solutions over time Furthermore on outlining the advantages of using set covering based integer linear programming models for sub instance solving the author shows how to apply CMSA to problems naturally modelled by non binary integer linear programming models The book concludes with a chapter on topics such as the development of a problem agnostic CMSA and the relation between large neighborhood search and CMSA Combinatorial optimization problems used in the book as test cases include

the minimum dominating set problem the variable sized bin packing problem and an electric vehicle routing problem The book will be valuable and is intended for researchers professionals and graduate students working in a wide range of fields such as combinatorial optimization algorithmics metaheuristics mathematical modeling evolutionary computing operations research artificial intelligence or statistics *Project Portfolio Management, Second Edition* Clive N. Enoch,2019-02-13 The focus of this book is aimed at providing a mechanism to determine the individual and cumulative contribution of portfolio components to strategic objectives so that the right decisions can be made regarding those components Project portfolio management PfM is a critically important discipline which organizations must embrace in order to extract the maximum value from their project investments Essentially PfM can be defined as the translation of strategy and organizational objectives into projects programs and operations portfolio components the allocation of resources to portfolio components according to organizational priorities alignment of components to one or more organizational objectives and the management and control of these components in order to achieve organizational objectives and benefits The interest and contribution to the body of knowledge in project portfolio management has been growing significantly in recent years however a particular area of concern is the decision making during the management of the portfolio regarding which portfolio components to accelerate suspend or terminate Failing to determine how the individual and cumulative components of a portfolio contribute to an organization's strategic objectives leads to poorly informed decisions that negate the positive effect that a sound understanding of project portfolio management could have in an organization 16th European Conference on Management, Leadership and Governance Dr Paul Griffiths,2020-10-26 These proceedings represent the work of
