Optima's PC Series Sprinkler Timer is the central unit that controls watering times for your automatic sprinkler system. The following information provides an overview of how the timer works.

Stations

To meet the different watering requirements of your lawn, trees, flowers, and other landscaping, you can divide your yard into separate areas called "stations" or "zones".* Each "station" has one valve that controls multiple spray heads or sprinklers. For example, if you have 4 valves, you can divide your lawn into 4 "stations". See the figure below. (You cannot link more than one valve to one "station.") You can however, select a different length of watering time for each "station".

* In the sprinkler industry, the terms "stations" and "zones" have the same meaning.
