Monthly Catalog of United States Government Publications ,1993 Monthly Catalogue, United States Public Documents ,1993-12 Geoengineering our Climate? Jason J. Blackstock,Sean Low,2018-09-04 If the detrimental impacts of human induced climate change continue to mount technologies for geoengineering our climate i e deliberate modifying of the Earth s climate system at a large scale are likely to receive ever greater attention from countries and societies worldwide Geoengineering technologies could have profound ramifications for our societies and yet agreeing on an international governance framework in which even serious research into these planetary altering technologies can take place presents an immense international political challenge In this important book a diverse collection of internationally respected scientists philosophers legal scholars policymakers and civil society representatives examine and reflect upon the global geoengineering debate they have helped shape Opening with essays examining the historic origins of contemporary geoengineering ideas the book goes on to explore varying perspectives from across the first decade of this global discourse since 2006 These essays methodically cover the practical and ethical dilemmas geoengineering poses the evolving geoengineering research agenda the challenges geoengineering technologies present to current international legal and political frameworks and differing perceptions of geoengineering from around the world The book concludes with a series of forward looking essays some drawing lessons from precedents for governing other global issues others proposing how geoengineering technologies might be governed if as they begin to emerge from the lab into the real world This book is an indispensable resource for scientists activists policymakers and political figures aiming to engage in the emerging debate about geoengineering our climate **Shared Governance for Sustainable Working Landscapes** Timothy M. Gieseke,2016-08-05 Sustaining our agricultural landscapes is no longer just a technical scientific or even political problem but it has evolved into a socially complex so called wicked problem of conflicting social governance and economics This creates an extreme economic obstacle where the value of ecosystem services remains low and diffuse and the transactions costs remain high and multiple Using Uber like business platform technology and a shared governance model a symbiotic demand for environmental benefits is created Enabling multi sector transactions for environmental benefits this platform innovation would remedy the tragedy of the commons the economic nemesis to achieving landscape sustainability In a nutshell to sustain our agricultural landscapes a transdisciplinary approach supported by a shared governance model housed within a multi sided platform is needed This book introduces an assessment framework identifying governance actors styles and ratios for socio ecological systems The assessment uses a new governance compass to identify the types of actors completing which tasks and identifies the styles of governance used to complete the tasks It is aimed to anyone involved in sustainability science agricultural policy planning or integrated landscape design *Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)* Union of International Associations,2014-06-16 Volume 1 A and B covers

international organizations throughout the world comprising their aims activities and events *Identifying and Comparing Important Areas for Marine Sustainable Use and Conservation* Sofie Van Parijs, Joseph Appiott, Leslie New, Piers Dunstan, Giuseppe Notarbartolo di Sciara, 2024-05-24 The ocean is under increasing threat from the expansion of human activities The combined impacts of these threats as well as the potential impacts of climate change and ocean acidification have placed thousands of species at risk of extinction and have impaired the structure function productivity and resilience of marine ecosystems Currently some parts of the world's oceans are significantly impacted yet are without any form of effective management Only a small proportion of the oceans are within protected area systems Globally measures are being taken to increase protection and sustainable management but application is uncoordinated and not always effective In order to support effective policy action by countries and competent international and regional organizations it is critical to build a sound understanding of the most ecologically and biologically important ocean areas that support healthy marine ecosystems so that the necessary steps to ensure the long term function and resilience of these systems can be taken **Antarctic Krill and Interactions in the East Antarctic Ecosystem** So Kawaguchi, Sophie Bestley, Martin Cox, Kerrie M. Swadling, Elanor Bell, 2025-08-19 Antarctic krill *Euphausia superba* is the target of the largest commercial fishery in the Southern Ocean Its abundance varies regionally and exhibits great interannual variability This natural variability combined with climate change effects could have substantial consequent impacts on krill predators and the magnitude of ecologically sustainable fishery catch limits Recent increase in the krill catch is due to technological developments in both harvesting and catch processing methods as well as interest in new products derived from krill e.g dietary supplements and pet food The krill fishery is managed by the Commission for the Conservation of Antarctic Marine Living Resources CCAMLR The krill fishery first commenced in 1970's off East Antarctica but the main fishing ground shifted to the South Atlantic sector from the 1990's Interest to fish off East Antarctica has been expressed by CCAMLR Member nations in recent years and the krill fishery recommenced in Indian Ocean sector of East Antarctic sector in the 2016/17 fishing season Given the increase in recent commercial interest the trigger level total allowed catch in one of the management areas CCAMLR Subarea 48.1 has been reached seven times in the Southwest Atlantic the East Antarctic fishery is likely to expand in coming years CCAMLR employs an ecosystem based management approach This requires a wide range of data and information from across regional ecosystem components In the southwest Atlantic sector krill management is based on large scale krill biomass surveys undertaken in 2000 and 2019 together with various national Antarctic programs conducting annual regional scale monitoring this provides assessments of year to year variation of krill ecosystem parameters for CCAMLR to ensure harvesting is carried out in a sustainable manner Contrary to the relatively data rich Southwest Atlantic sector current precautionary catch limits for the krill fishery off East Antarctica are solely based on information collected through the two large scale multidisciplinary surveys conducted by Australia in Divisions 58.4.1 in 1996 and 58.4.2 in 2006 This Research Topic gathers up to date

scientific analysis on the East Antarctic ecosystem arising from recent marine science voyages such as ENRICH Euphausiids and Nutrient Recycling In Cetacean Hotspots in 2019 and TEMPO Trends in Euphausiids off Mawson Predators and Oceanography in 2021 Our topic provides an opportunity to explore ecosystem wide scientific studies including non exclusively krill biomass ecosystem structure and interactions between krill krill predators oceanography and primary production to inform sustainable krill fishery management in the region *Oceanobs'19: An Ocean of Opportunity.
