# Administration and Scoring of the NEO-FFI-3

The NEO-FFI-3 is a 60-item version of the NEO-PI-3 that provides a brief, comprehensive measure of the five domains of personality. It consists of five 12-item scales that measure each domain. Information on specific facets within each domain is not provided, and the shortened scales are somewhat less reliable and valid than the full NEO-PI-3 domain scales. Separate versions are available for Form S and Form R and for adults and adolescents.

### Administration

The NEO-FFI-3 may be administered individually or in groups. The testing environment should be comfortable and free of distractions and provide adequate lighting. A pencil and a flat surface, such as a desk or clipboard on which the respondent can write, are also needed for administration. If the respondent uses eyeglasses, the examiner should be sure that they are being used during testing. The examiner should engage the respondent in the task of completing the test to reduce the possibility of response sets or random responding to the items.

### Directions

Provide each respondent with a NEO-FFI-3 Item Booklet and a pencil. Tell the respondent to read the instructions for completing the NEO-FFI-3, which are on the first page. After the instructions have been read and the respondent understands the nature of the task, tell him or her to turn to the second page of the Item Booklet and to provide the identifying information requested at the top of that page. If an identification number is to be used, provide the respondent with the number so he or she can enter it, or fill it in yourself.

If Form R is being used, the respondent should provide the name (or initials) of the person being rated. *It is the examiner's responsibility to ensure that the person being rated can be correctly identified by name, initials, ID number, and/or the name of the rater.* The examiner is also responsible for ensuring that all identifying information is properly marked on the Item Booklet. Note that responses to the NEO-FFI-3 are made across the rows of the response grid.

*There is no time limit for the NEO-FFI-3.* Most respondents require 5 to 10 minutes to complete the measure, but older respondents and those with limited reading skills may take longer. The NEO-PI-3 alternative administration procedures previously described may also be used with the NEO-FFI-3.

### Scoring

#### Missing Responses

Once the measure has been completed, examine the response area of the Item Booklet to be sure that a response has been given for each item. If unanswered items are found, the respondent should be asked to complete them. If a respondent is unsure of the meaning of an item or is unsure of how to respond, he or she may be told to use the *neutral* response option. It is also appropriate to explain the meaning of words the respondent does not understand (see chapter 3 of this Professional Manual for more information).

If the respondent did not provide a response to every item and the respondent is no longer available to the examiner, the examiner must determine whether the data may be validly scored and interpreted. If 10 or more items have been left blank, the test is considered invalid and should not be formally scored. If nine or fewer items have been left blank, the blank items should be scored as if the *neutral* response option was selected. Any domain for which there are more than four missing responses should be interpreted with caution.

#### Validity Checks

At the bottom of the third page of the NEO-FFI-3 Item Booklets, three yes-or-no items ask the respondent if he or she has (a) responded to all of the statements, (b) entered responses across the rows, and (c) responded accurately and honestly. In most cases, if the respondent indicated that responses were not entered in the correct boxes or were not answered honestly and accurately, the test should not be scored.

Hofmann,2017-10-23 The first book to offer a truly global perspective on the theory and practice of clinical psychology While clinical psychology is practiced the world over up to now there has been no text devoted to examining it within a global context The first book of its kind Clinical Psychology A Global Perspective brings together contributions from clinicians and scholars around the world to share their insights and observations on the theory and practice of clinical psychology Due partly to language barriers and entrenched cultural biases there is little cultural cross pollination within the

field of clinical psychology In fact most of the popular texts were written for English speaking European and Anglo American audiences and translated for other countries As a result most psychologists are unaware of how their profession is conceptualized and practiced in different regions or how their own practices can be enriched by knowledge of the theories and modalities predominant among colleagues in other parts of the world This book represents an important first step toward rectifying that state of affairs Explores key differences and similarities in how clinical psychology is conceptualized and practiced with children adolescents and adults across different countries and cultures Addresses essential research methods clinical interviews psychometric testing neuropsychological assessments and dominant treatment modalities Follows a consistent format with each chapter focusing on a specific area of the practice of clinical psychology while integrating cultural issues within the discussion Includes coverage of how to adapt one's practice to the differing cultures of individual clients and how to work in multidisciplinary teams within a global context Clinical Psychology A Global Perspective is a valuable resource for students trainees and practicing psychologists especially those who work with ethnic minority groups or with interpreters It is also a must read for practitioners who are considering working internationally
