*Primary PE: Unlocking the Potential* Anne Williams, Joanne Cliffe, 2011-05-16 This book aims to address some of the aspects of primary physical education about which there is currently a dearth of high quality texts. It arises from several contextual elements that create a need for something a little different from books currently on offer. Most of these offer guidance on content and teaching skills across the activities of the National Curriculum together with supplementary information about key issues and processes for example assessing pupils or including those with special needs. This proposal focuses on learning about primary PE and its potential to contribute not only as a discrete curriculum subject but also across the whole curriculum and to some of the many strategies and initiatives that have been set up to enhance primary practice and achievement. Topics have been selected as the focus for the chapters in this book not only for their current significance within strategies and initiatives but for their potential to contribute to the enhancement of the curriculum in the longer term and particularly in the context of the recommendations of the Rose review and the imminent revisions to the primary national curriculum.

*Elite Sport and Sport-for-All* Richard Bailey, Margaret Talbot, 2015-08-11 Sport is often perceived as being divided into two separate domains: mass participation and elite. In many countries, policy and funding in these two fields are managed by separate agencies and investment is often seen as a choice between the two. *Elite Sport and Sport for All* explores the points of connection and sources of tension between elite and mass participation sport. The book's multi-disciplinary and international line-up of contributors seeks to define, examine and develop solutions to this problematic relationship. Drawing on research and case studies from around the world with examples from Denmark, Canada, South Africa and Israel, the book explores key contemporary issues including: does effective talent identification require depth of participation? do elite performances inspire greater participation? the role of the Paralympic movement in mass participation and elite sport and the economic aspects of their co-existence. The first study of its kind, *Elite Sport and Sport for All* addresses a central dichotomy in sport policy and as such is important reading for all students, researchers, policy makers or administrators working in sport development and policy.

**Routledge Handbook of Sport History** Murray G. Phillips, Douglas Booth, Carly Adams, 2021-09-19 The *Routledge Handbook of Sport History* is a new and innovative survey of the discipline of sport history. Global in scope, it examines the key contemporary issues in sports historiography, sheds light on previously ignored topics and sets an intellectual agenda for the future development of the discipline. The book explores both traditional and non-traditional methodologies in sport history and traces the interface between sport history and other fields of research such as literature, material culture and the digital humanities. It considers the importance of key issues such as gender, race, sexuality and politics to our understanding of sport history and focuses on innovative ways that the scholarship around these issues is challenging accepted discourses. This is the first handbook to

include a full section on Indigenous sport history a topic that has often been ignored in sport history surveys despite its powerful upstream influence on contemporary sport The book also reflects carefully on the central importance of sport history journals in shaping the development of the discipline This book is an essential reference for any student researcher or scholar with an interest in sport history or the relationship between sport and society It will also be fascinating reading for any historians looking for fresh perspectives on contemporary historiography or social and cultural history Folens GCSE P.E.
