long deemed untreatable At the same time however the United States is facing the vexing challenge of a seemingly uncontrolled rise in the cost of health care Total medical expenditures are rapidly approaching 20 percent of the gross domestic product and are crowding out other priorities of national importance The use of increasingly expensive prescription drugs is a significant part of this problem making the cost of biopharmaceuticals a serious national concern with broad political implications Especially with the highly visible and very large price increases for prescription drugs that have occurred in recent years finding a way to make prescription medicines and health care at large more affordable for everyone has become a socioeconomic imperative Affordability is a complex function of factors including not just the prices of the drugs themselves but also the details of an individual's insurance coverage and the number of medical conditions that an individual or family confronts Therefore any solution to the affordability issue will require considering all of these factors together The current high and increasing costs of prescription drugs coupled with the broader trends in overall health care costs is unsustainable to society as a whole Making Medicines Affordable examines patient access to affordable and effective therapies with emphasis on drug pricing inflation in the cost of drugs and insurance design This report explores structural and policy factors influencing drug pricing drug access programs the emerging role of comparative effectiveness assessments in payment policies changing finances of medical practice with regard to drug costs and reimbursement and measures to prevent drug shortages and foster continued innovation in drug development It makes recommendations for policy actions that could address drug price trends improve patient access to affordable and effective treatments and encourage innovations that address significant needs in health care

An Introduction to Transnational Criminal Law Neil Boister, 2018-04-19 National borders are permeable to all types of illicit action and contraband goods whether it is trafficking humans body parts digital information drugs weapons or money Whilst criminals exist in a borderless world where territorial boundaries allow them to manipulate different markets in illicit goods the authorities who pursue them can remain constrained inside their own jurisdictions In a new

edition of his ground breaking work Boister examines how states must cooperate to tackle some of the greatest security threats in this century so far analyses to what extent vested interests have determined the course of global policy and law enforcement and illustrates how responding to transnational crime itself becomes a form of international relations which reorders global political power and becomes at least in part an end in itself Arguing that transnational criminal law is currently geared towards suppressing criminal activity but is not as committed to ensuring justice Boister suggests that it might be more strongly influenced by individual moral panics and a desire for criminal retribution than an interest in ensuring a proportional response to offences protection of human rights and the preservation of the rule of law The Canadian Health Information Management Lifecycle CHIMA,2017-05-09 This HIM lifecycle resource will be useful to a wide range of jurisdictions that manage health information The document will provide a summary of the recommended leading practices and principles related to managing health information throughout its lifecycle regardless of the type of jurisdiction or information media Publisher s website *The United Nations Global Compact and the Encyclical Laudato Si* Oliver F. Williams,2023-04-21 In April 2016 the Center for Ethics and Religious Values in Business of the Mendoza College of Business at the University of Notre Dame with the United Nations Global Compact UNGC Office convened a group of scholars and business leaders to discuss the Encyclical Laudato Si LS and the UN Sustainable Development Goals SDGs The articles in this special issue are from that conference the hope is that they will provoke your thinking and lead to new action to make the world a better place How is it that the secular United Nations and the religious Vatican have a common vision for business At root this common vision for business flows from a common vision for society as a whole For business flowing from this common vision is a common understanding of the purpose of business Catholic social thought has always taught that the single minded focus on making money in business can never be acceptable The purpose of business is to create sustainable value for stakeholders and that value is not exclusively monetary value Historical Dictionary of Lesotho John Aerni-Flessner,Charles Fogelman,Nthabiseng Mokoena-Mokhali,2023-11-30 Lesotho s history has long been defined by its enclave status within South Africa but it is a hard fought and hard won status that helps unite Basotho through the shared history of struggle against colonial rule in the region Since the end of apartheid in 1994 Lesotho s status as a separate entity has been called into question though the fierce national pride built through centuries of resistance to outside rule has mitigated against any serious discussions of incorporating Lesotho into South Africa Still the political instability and lack of a flourishing domestic economy have made life difficult for the majority of Basotho and could call into question the viability and legitimacy of the state in the eyes of its citizens if it cannot enact significant reforms in the coming decades Historical Dictionary of Lesotho Third Edition contains a chronology an introduction and an extensive bibliography The dictionary section has more than 500 cross referenced entries on important personalities as well as aspects of the country s politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone
