

6. Decide on the amount of sugar you would like to add to supersaturate:

_____ water: _____

6. Begin adding the sugar one increment at a time, stirring after each addition. You will notice that it takes longer for the sugar to dissolve after each addition. Keep track of how much sugar you are adding. You want the solution to be supersaturated, or to be able to hold as much sugar as it possibly can.

Remove the pan from the heat.

a. Total amount of sugar we added: _____

b. Ratio of sugar to water we used: _____

7. You want to make sure that the sugar coated sticks are completely dry before placing them in the jar. The rock candy needs the sugar to grow on, and if the sugar on the sticks isn't dry it will dissolve in the water. It is also important to make sure that the sticks are not touching the bottom or sides of the jar.

8. That's all! It is now time to sit back and observe the jars.
