Berthoz, 2008-11-14 At the beginning of the 20th century German biologist Jakob von Uexküll created the concept of Umwelt to denote the environment as experienced by a subject This concept of environment differs from the idea of passive surroundings and is defined not just by physical surroundings but is rather a subjective universe a space weighted with meaning Today neuroscience provides a new way to look at the brain's capability to create a representation of the world At the same time behavioural specialists are demonstrating that animals have a richer mental universe than previously known Philosophical reflection thus finds itself with more experimental and objective data as well Nearly a century after the publication of von Uexküll's founding work *Umwelt und Innenwelt der Tiere* was published in 1909 neurobiologists psychologists sociologists anthropologists ethologists and philosophers revisit his mail concept at the light of modern science
