New England Division, 1918      **Reforming Priesthood in Reformation Zurich** Jon D. Wood, 2018-11-12 The dramatic task of reimagining clerical identity proved crucial to the Renaissance and Reformation Jon Wood brings new light to ways in which that discussion animated reconfigurations of church state and early modern populace End Times considerations of Christian religion had played a part in upheavals throughout the medieval period but the Reformation era mobilized that tradition with some new possibilities for understanding institutional leadership Perceiving dangers of an overweening institution on the one hand and anarchic priesthood of all believers on the other hand early Protestants defended legitimacy of ordained ministry in careful coordination with the state The early Reformation in Zurich emphatically disestablished traditional priesthood in favour of a state supported prophethood of exegetical linguistic expertise The author shows that Heinrich Bullinger's End Times worldview led him to reclaim for Protestant Zurich a notion of specifically clerical priesthood albeit neither in terms of statist bureaucracy nor in terms of the traditional sacramental character that his precursor Huldrych Zwingli had dismantled Clerical priesthood was an extraordinarily fraught subject in the sixteenth century especially in the Swiss Confederation Heinrich Bullinger's private manuscripts helpfully supplement his more circumscribed published works on this subject The argument about reclaiming a modified institutional priesthood of Protestantism also prompts re-assessment of broader Reformation history in areas of church state coordination and in major theological concepts of covenant and justification that defined religious confessional distinctions of that era

**The Justice and Development Party in Turkey** Toygar Sinan Baykan, 2018-12-06 Turkish politics were remarkably reshaped in the early 2000s following the decline of the Islamist National View and the electoral breakthrough of the new Justice and Development Party JDP headed by Erdoğan Beside its Islamist credentials Erdoğan's JDP consistently and convincingly presented itself as the populist defender of the downtrodden sectors of Turkish society However with Erdoğan's rise as the

popularly elected president in 2014 Turkey's already fragile democratic system was driven in a more authoritarian direction. Shifting the focus away from structural factors, this book analyzes the political appeal and organisation of the JDP that granted them such unprecedented electoral resilience. With critical but accessible theoretical discussions, Toygar Sinan Baykan locates the JDP within the wider literature of populism, Islamist party politics, party organisations and authoritarianism. Over fifty in-depth interviews also help to relate the intimate story of Turkey's socio-cultural divides and the JDP's intraparty organisational dynamics, thereby offering a fresh account of Turkish politics.
