new anatomical and clinical illustrations **Ethical Dilemmas for Critically Ill Babies** Eduard Verhagen, Annie Janvier, 2015-10-06 Most neonates who now survive intensive care would have died 50 years ago and nature would have decided the outcomes making ethical discussions about initiating or withholding resuscitation irrelevant Medical developments in neonatology have changed the way we respond to diseases of neonates to their illness and to their parents Not only as physicians but also as a society Decisions on when to start withhold or withdraw life saving interventions in critically ill neonates are among the most difficult decisions in pediatric practice These decisions are fraught with ethical dilemmas for example deciding whether withholding intensive care leading to death is superior to uncertain survival with a risk of disability and the additional burden of intensive care This book covers important ethical questions that arise in neonatal intensive care units Questions such as whether to intervene medically and whether we are good at predicting the outcome of fragile neonates whether a medical intervention should be withheld or withdrawn and who should be primarily responsible for these decisions and how Neonatal Airway Management Lindsay C. Johnston, Taylor Sawyer, 2025-01-24 Intubation is one of the most performed procedures in neonatal medicine The field of neonatal airway management has been transformed by many notable developments over the past 5 10 years Most importantly the use of pre medication video laryngoscopy and laryngeal masks have been the subject of numerous recent clinical investigations and academic publications Despite ongoing research neonatal airway management continues to carry a high risk of complications and both short and long term morbidities A comprehensive book on neonatal airway management has never been published Hence the proposed book fills an important niche in the healthcare literature This book provides a comprehensive state of the art review of neonatal airway management and serves as a valuable resource for clinicians educators and researchers involved in neonatal care The book reviews patient practice provider and system factors important in neonatal airway management Chapters explore key topic areas including airway management techniques training competency assessment premedication video laryngoscopy laryngeal mask airway and others Written by experts in the field and including the most up to date scientific and clinical information Neonatal Airway Management serves as a useful resource for physicians and researchers dealing with and interested in neonatal airway management It provides a concise yet comprehensive summary of the current state of the field that helps guide patient management and stimulates investigative efforts Breathe, Baby, Breathe! Annie Janvier, MD, PhD, 2020-01-04 Neonatal intensive care prematurity and complicated pregnancies Fetal and Neonatal Pharmacology for the Advanced Practice Nurse Amy Jnah, Amy J. Jnah, Christopher McPherson, 2023-06-01 This book is a rare find for APRNs especially PNP and NNPs and provides excellent APRN collaboration instances in everyday clinical and academic settings The chapters are written by interprofessional healthcare providers such as NNPs and PharmDs and provide information and practice guidelines from a collaborative perspective Holly Wei PhD RN CPN NEA BC FAAN Professor and Assistant Dean for PhD Program University of Louisville School of Nursing This is the first text to address fetal

and neonatal pharmacology for the APN and nursing student With a strong focus on interprofessional collaboration it delivers core pharmacologic concepts and practice guidelines in a clear systematic manner for ease of use This resource reflects real word scenarios as it discusses perinatal and intrapartum pharmacologic therapies and their implications for fetuses and neonates It covers such postnatal pharmacology considerations as human milk and maternal drug addiction A table including 100 of the most commonly used medications prescribed in the NICU serves as a quick reference for both academic and clinical settings The text explores the genesis evolution and current knowledge surrounding pharmacologic therapies used to treat common problems afflicting preterm and critically ill neonates Chapters written by interprofessional teams include illustrations and concept maps of key content promoting active learning for visual and tactile learners learning objectives and discussion questions The text meets the accreditation requirements for MSN and DNP programs offering the 3P courses to neonatal and pediatric NP students Clinical Nurse Specialist students and midwifery students Key Features Provides clear concise descriptions of principles of fetal and neonatal pharmacology Includes illustrations and concept maps providing visual and tactile learners with tools to engage and demonstrate active learning Presents illustrations and concept maps of key content to foster active learning for visual and tactile learners Offers Learning Objectives and Discussion Questions in each chapter Includes a table of 100 commonly used NICU medications Provides core curricular content written by interprofessional author teams which aligns with the 2021 AACN Essentials and 2022 NTFS Standards for Quality Nurse Practitioner Education

HADI COMPREHENSIVE NEONATAL MEDICATIONS DR.ABDELHADI ABDELGABBAR
ABDELHADI,2024-01-24 This publication is intended to provide comprehensive yet concise information on indications doses preparation administration and adverse reactions of drugs in use during the neonatal period There is particular emphasis on preparation and administration by neonatal nurses Compatibility of intravenous medications with concurrent other fluids or medications are thoroughly addressed The routes for the administration of various medications are delineated The most recognised adverse effects of various medications are flagged up but the lists are by no means all inclusive It is advisable to consult up to date periodically if reactions or side effects outside the specific monograph texts are encountered Furthermore the publication focuses on known contraindications precautions and practical advice A considerable effort has been exercised to ensure the doses calculations with or without dilutions are accurate However further confirmation by the nursing and medical personnel is advised prior to the first use of each individual monograph Feedback and suggestions are appreciated and can be sent to neonatologypractical gmail com It is acknowledged that many neonatal units prefer to custom their own dilutions concentrations and infusion times Nevertheless the information in the various monographs is counterchecked with the practice of various well recognised international neonatal units The use of computerised programmed infusion pumps is ideal but is not available in most nurseries The latest edition of the British National Formulary for Children BNFc September 2022 September 2023 Last updated 14 December 2022 is used as the primary source for many medications doses side effects

and contraindications Various other useful references are utilised and are listed on the last page The intention is to update the information on the web version of this publication on a regular basis The publication is written bearing in mind the wide variations in the skill mix of neonatal practitioners both nurses and doctors Likewise the challenging circumstances in developing countries are taken into consideration Many of the stated calculations methods of infusions or administration and monitoring requirements may appear too extensive and long winded However this is intended to be excessively simple to take some pressure off the shoulders of busy doctors and nurses Printing and laminating individual monographs for the commonly used medications extracted from this publication is highly recommended It would provide a quick and easily accessible source when every minute counts The publication reflects the author s own acceptable and safe practices and advice It is written with the intention of facilitating the delivery of care to the most vulnerable newborn However the responsibility of correct prescriptions calculations and administration falls on the individual practitioners The clinical pharmacist of the hospital may be requested to endorse individual drug monographs or the whole publication before the neonatal unit adopts it It is a legal requirement to advise users of the information provided within this publication that the editor and publisher are not responsible for any errors or omissions and or any consequences arising from the use of the information in this book
