Now you will need to find which phase of the moon Kreludor is at. To do this, take your angle measure (found in the above step), and divide by 22.5. This number may be a decimal, so you will need to be able to round. If the number after the decimal is 5 or greater, you will add one to the number before the decimal and drop all numbers after the decimal. If the number after the decimal is 4 or less, you will drop all numbers after the decimal. The resulting number will tell you which phase of the moon the Gnorbu is displaying for you if you use the chart below. If the rounded number is 0 or 16, it will be a full moon, but if it is 8, there will be no visible moon. If your head is spinning from all of that math, then simply enter your angle above at the top of this guide!

Moon Phases

8	9	10	11	12	13	14	15
0,16	1	2	3	4	5	6	7

Calculate Your Phase

Use the instructions above to obtain your angle, and then plug it in below:

Prizes

For providing the correct phase of Kreludor, you will receive one of the prizes in the table below. Some of them are only given out at the Lunar Temple, while others are common items that can be found elsewhere.
