Which statement best describes how reactive power MVAR power normally flows? - High Voltage to Low Voltage

Which of the following types of data are BA and RC not required to share with one another? - Generator start up cost

TOP must develop, maintain, and implement formal policies and procedures to provide for transmission reliability. Which of the following DOES NOT need to be addressed in these policies and procedures? - Planned outages of generation units

A 1000 MVA rated generator that produces 800 MW and 100 MVAR is best described as? - Operating in a lagging mode. Inductive system

Which of the following types of MW load is the most impacted by an intentional frequency reduction? - Motor

Assume there are two 250 mile long transmission lines exporting an excessive amount of MW from a generation area to a load area. One of the lines suddenly trips and the area power system collapses within a few seconds. The most likely cause of the collapse? - Angle instability
