OECD Health Policy Studies Realising the Potential of Primary Health Care OECD,2020-05-30 This report examines primary health care across OECD countries before the COVID 19 pandemic and draws attention to how primary health care is not living up to its full potential Doing things differently through new models of organising services better co ordination among providers better use of digital technology and better use of resources and incentives helps to improve care reduce the need for hospitalisations and mitigate health inequalities Ownership and Governance of Companies Jonathan

Michie,Vishnu Padayachee,2021-06-29 Apartheid South Africa was often thought to run in the interests of the business elite Yet 27 years after apartheid those business interests remain largely entrenched Why Did the South African business community play a role in engineering this outcome perhaps recognising the apartheid era was over and jumping ship in time Conversely the mission of the ANC was widely perceived to be to shift wealth and power into the hands of the whole community Yet despite black empowerment measures corporate ownership remains largely in white hands and certainly in the hands of an elite few even though no longer restricted to whites This picture is replicated across the global south where corporate ownership tends to be concentrated in the hands of an elite rather than being more democratically spread Why have alternative corporate forms not been pursued more vigorously with ownership in the hands of customers employees and local communities In the case of South Africa where the majority of customers and employees are black this could have delivered on the ANC s mission to replace the apartheid era with a democratic one in terms of wealth incomes and power as well as in terms of voting and civic rights This edited volume explores all these questions and looks at ways to align corporate forms with economic and social goals The chapters in this book were originally published as special issues of International Review of Applied Economics **Behavioral Emergencies for Healthcare Providers** Leslie S. Zun,Kimberly

Nordstrom,Michael P. Wilson,2021-01-04 This fully updated second edition focuses on mental illness both globally and in terms of specific mental health related visits encountered in emergency department settings and provides practical input

from physicians experienced with adult emergency psychiatric patients. It covers the pre-hospital setting and advising on evidence-based practice from collaborating with psychiatric colleagues to establishing a psychiatric service in your emergency department. Potential dilemmas when treating pregnant geriatric or homeless patients with mental illness are discussed in detail along with the more challenging behavioral diagnoses such as substance abuse, factitious and personality disorders, delirium, dementia, and PTSD. The new edition of *Behavioral Emergencies for Healthcare Providers* will be an invaluable resource for psychiatrists, psychologists, psychiatric and emergency department nurses, trainee and experienced emergency physicians, and other mental health workers.

Health Equity in a Globalizing Era Ronald Labonté, Arne Ruckert, 2019-03-13

Why do some countries and populations suffer from poverty and ill health whilst others are more prosperous and healthy? What are the inherently global trans-border issues that affect inequities in disease burden and health opportunities for individuals and nations? Traditionally the focus of global health has been international health, the concern for high burdens of disease in generally low-income countries. To answer these questions, however, we need to modernise our understanding of globalization as a phenomenon. *Health Equity in a Globalizing Era: Past Challenges, Future Prospects* examines how globalization processes since the onset of neoliberalism affect equity in global health outcomes and emphasises access to important social determinants of health. With a basis in political economy, the book covers key globalization concepts and theory and presents a thorough background to the field. Case studies, illustrations, and new research all combine to make this title a comprehensive and current discussion of the various pathways that connect globalization to health equity outcomes. It looks at changes in migration, labour markets, trade, and investment rules; international development assistance; health systems; infectious and non-communicable disease risks; environmental health; and gendered aspects of globalization's health dialectic. In addition, it argues for a reform of the global governance structure, the significant role of human rights, and the importance of a strong civil society in achieving greater social justice in health. Ideal for senior undergraduate and graduate students in global health programs, global health scholars, and practitioners in government policy and health development, NGOs, *Health Equity in a Globalizing Era: Past Challenges, Future Prospects* is a significant contribution to our new understanding of globalization and global public health.
