

NETGEAR

Model GS108T (Gigabit Ethernet Switch) (GS108T)

Estimated installation time: 1-10 minutes

Package Contents

The package includes:

- Package 8-Port Gigabit Ethernet Switch (GS108T)
- AC power adapter
- GS108T Installation Guide (this document)
- Warranty/Support information card

Prepare to Install the Switch

Decide where you want to place the switch. Find a flat horizontal surface such as a table, desk or shelf. You can use wall-mounting screws that are provided to hang the switch in an open space on a wall.

Make sure the selected location is:

- Not in direct sunlight or near a heater or heating vent.
- Not cluttered or crowded. There should be at least 2 inches (5 cm) of clear space on all sides of the switch.
- Well ventilated, especially if it is in a closet.

Depending on the speed of your network devices, you need a Category 5 (10 Mbps), Category 5e (100 Mbps) or Category 6 (1000 Mbps) Ethernet cable with RJ-45 connectors for each device you want to connect to the switch. Each Ethernet cable used for less than 328 feet (100 meters).

Install the Switch and Connect the Other Devices

1. Place the switch on a flat surface or back onto the screws.
2. For each device, insert one end of an Ethernet cable into the port on the device and insert the other end into one of the Ethernet ports on the switch.

3. Connect the power adapter cord into the back of the switch and then plug the adapter into a power source (such as a wall outlet or power strip).
4. Check the LEDs to verify that the equipment is connected correctly.

The corresponding Link LEDs for each connected and powered device should light when connected and flash when activity occurs. If the connection is 10 Mbps or 100 Mbps, one of the LEDs in the RJ-45 jack will light up. If the connection is 1000 Mbps, then both LEDs in the RJ-45 jack will light up.

Note: If any light does not operate as indicated, go to the Troubleshooting section.

Troubleshooting

The Power light is not lit.

The switch has no power.

- Make sure that the power adapter is correctly connected to the switch.
- Make sure that the power adapter is connected to a functioning power outlet. If it is in a power strip, make sure that the power strip is turned on. If the outlet is controlled by a light switch, make sure that the switch is in the on position.
- Make sure you that are using the NETGEAR power adapter supplied with your switch.

The Link LED is not lit for a connected device or stays on continuously.

There is a hardware connection problem.

- Make sure that the cable connections are securely plugged in to the switch and the device.
- Make sure that the connected device is turned on.
- If the Ethernet cable is connected to a HUB or other Ethernet adapter, make sure that the card or adapter is installed correctly and is working.
- Make sure that the cable is less than 328 feet (100 meters).
