people Post-Growth Work Irmi Seidl, Angelika Zahrnt, 2021-09-08 This book argues that society must rethink the notion of formal employment and instead introduce and spread the notion of meaningful work so that societies can become independent of economic growth The excessive consumption of natural resources and the immense emissions resulting from our growth oriented economic system surpass the planetary boundaries Despite this society and the economy still strive for economic growth in order to generate jobs to finance the social security system and to assure tax income However these expectations are increasingly unrealistic not least because technological developments such as digitalisation and robotisation will change and limit formal employment opportunities as well Against this backdrop the book introduces the notion of meaningful activities that embrace various kinds of work paid and unpaid sequential or in parallel which are meaningful for the worker as well as society as a whole At the same time the authors argue in favour of reduced working time in formal employment Furthermore the book also describes the necessary transformations in companies and for consumers for social and tax systems for social services and agriculture Innovative and timely this book will be a key resource for professionals and scholars interested in sustainability economics work transformation and post growth studies **Confucius** Charlene Tan, 2013-08-15 Confucius was indisputably a major thinker in education Charlene Tan's volume offers a coherent account of Confucius educational thought This work is divided into three distinctive parts 1 Intellectual Biography of Confucius 2 Critical Exposition of Confucius Work 3 Relevance of Confucius Work Today **A. Treat or Trick? Halloween in a Globalising World Malcolm Foley, Hugh O'Donnell, 2008-12-18 In 1999 the French bishops condemned the celebration of Halloween in France In 2003 the Moscow Department of Education recommended the banning of Halloween celebrations in all educational institutions under its control In 2008 a group of Catalan intellectuals launched an internet petition against the Halloween celebrations organised by the Port Aventura theme park arguing that they were detrimental to long standing Catalan traditions associated with 31 October In the meantime children and young people all over Europe and increasingly adults are energetically adopting and adapting the American version of Halloween as a source of fun community building and general revelry So are we all being tricked by rampant cultural imperialism or responding creatively to the arrival of Halloween as a welcome onset of winter treat This book which arose out of the first ever conference on the topic of Halloween held in Glasgow Scotland on 31 October 2006 brings together a series of studies examining the phenomenon of Halloween from a wide range of perspectives its origins the ways in which it is now and has been in the past celebrated in the British Isles its spectacular arrival in both Eastern and Western Europe over the last two decades its links with tourism and its multifaceted presence in the media What emerges is a phenomenon of astonishing complexity characterised by multiple meanings and intense battles over ownership **Lev Vygotsky** René van der Veer, 2007-11-15 Lev Vygotsky the great Russian psychologist had a profound influence on educational thought His work on the perception of art cultural historical theory of the mind and the zone of proximal development all had an impact on

Thompson,2022-11-14 This book provides a new account of the emergence of the philosophy of personal identity in the early modern period Reflection on personal identity is often thought to have begun in earnest with John Locke's famous consciousness based account published in the 2nd Edition of the Essay in 1694 The present work argues that we ought to understand modern notions of personal identity including Locke's own as emerging from within debates about the metaphysics of resurrection across the seventeenth century It recovers and analyses theories of personal identity and resurrection in Locke and Leibniz as well as largely forgotten theories from the Cambridge Platonists Thomas Jackson and Francisco Suarez The book narrates a time of radical change in conceptions of personal identity the period begins with a near consensus on hylomorphism according to which the body is an essential metaphysical part of the person The re-emergence of platonism in the period then undermines the centrality of the body for personal identity and this lays the groundwork for a more thoroughly psychological account of personal identity in Locke This work represents the first scholarly study to thoroughly situate early modern conceptions of personal identity embodiment and the afterlife within the context of late scholasticism Finally due to its focus on the arguments of the authors in question the work will be of interest to philosophers of religion as well as historians of philosophy **Directory of Publishing 2011** Continuum,2010-12-02 Comprehensive trade directory of the UK publishing industry and allied book trade suppliers associations and services The Confucian

Philosophy of Harmony Chenyang Li, 2013-10-30 Harmony is a concept essential to Confucianism and to the way of life of past and present people in East Asia Integrating methods of textual exegesis historical investigation comparative analysis and philosophical argumentation this book presents a comprehensive treatment of the Confucian philosophy of harmony The book traces the roots of the concept to antiquity examines its subsequent development and explicates its theoretical and practical significance for the contemporary world It argues that contrary to a common view in the West Confucian harmony is not mere agreement but has to be achieved and maintained with creative tension Under the influence of a Weberian reading of Confucianism as adjustment to a world with an underlying fixed cosmic order Confucian harmony has been systematically misinterpreted in the West as presupposing an invariable grand scheme of things that pre exists in the world to which humanity has to conform The book shows that Confucian harmony is a dynamic generative process which seeks to balance and reconcile differences and conflicts through creativity Illuminating one of the most important concepts in Chinese philosophy and intellectual history this book is of interest to students of Chinese studies history and philosophy in general and eastern philosophy in particular
