is the complete guide to the processes at work on our coastlines and the features we see in coastal systems across the world
Accessible to students from a range of disciplines the quantitative approach of this book helps to build a solid understanding
of wave and current processes that shape coastlines The resulting processes of erosion transport and deposition and the
features they create are clearly explained with over 400 illustrations and photographs From sandy beaches to coral reefs the
major coastal features are related to contemporary processes and to sea level changes over the past 25 000 years Key
equations describing or predicting measurements from instruments used to map these processes are all presented in this
