Lunar and Planetary Webcam User's Guide Martin Mobberley, 2006-08-03 In the last few years cheap webcams have revolutionized amateur astronomy by providing a very inexpensive alternative to purpose made astronomical CCD cameras which use refrigerated imaging chips and are thus extremely expensive Webcams are capable of more advanced work than normal digital cameras because their simple construction makes it easy to remove the webcam's lens allowing it to be interfaced directly to a telescope Using a webcam is not difficult but most amateur astronomers who have tried to do this do not achieve the finest results despite the webcam's potential There are numerous imaging and image processing tricks and techniques and all of them are needed to get the best results Along with webcam technology has come simple to use image processing and enhancement using a PC the most powerful technique is stacking in which the best images out of hundreds are selected and summed automatically to provide startlingly good results Lunar and Planetary Webcam User's Guide demystifies the jargon of webcams and computer processing and provides detailed hints and tips for imaging the Sun Moon and planets with a webcam He looks at each observing target separately describing and explaining all specialised techniques in context Glance through the images in this book to see just how much you can easily achieve by using a webcam with your telescope Movie/TV Soundtracks and Original Cast Recordings Price and Reference Guide Jerry Osborne, 2002-11

Energy Management and Conservation Handbook Frank Kreith,D. Yogi Goswami,2016-10-03 Energy is the mainstay of industrial societies and without an adequate supply of energy the social political and economic stability of nations is put into jeopardy With supplies of inexpensive fossil fuels decreasing and climate change factors becoming more threatening the need to conserve energy and move steadily to more sustainable energy sources is more urgent than ever before The updated Second Edition of this successful handbook includes chapters from leading experts on the economics and fiscal management of energy with a focus on the tools available to advance efficiency and conservation measures Updated coverage of renewable energy sources energy storage technologies energy audits for buildings and building systems and demand side management is provided The appendix of the handbook provides extensive data resources for analysis and calculation

Communicating Process Architectures 2000 World Occam and Transputer User Group. Technical Meeting,2000 Modern computing systems are built in terms of components and those components communicating Communication systems imply concurrency which is a theme of the WoTUG series Traditionally concurrency has been taught considered and experienced as an advanced and difficult topic The thesis underlying this conference is that that idea is wrong The natural world operates through continuous interaction of massive numbers of autonomous agents at all levels sub atomic human astronomic It seems it is time to mature concurrency into a core engineering discipline that can be used on an everyday basis to simplify problem solutions as well as to enable them The goal of Communicating Process Architectures 2000 was to stimulate discussion and ideas as to the role concurrency should play in future generations of scalable computer infrastructure and applications where scaling means the ability to ramp up functionality stay in control as complexity increases as well as physical metrics such as performance

Official Gazette of the United States Patent and Trademark Office ,2002 The Read-Out Controller ASIC for the ATLAS Experiment at LHC Stefan Popa,2022-12-17 This thesis presents the complete chain from specifications to real life deployment of the Read Out Controller ROC ASIC for the ATLAS Experiment at LHC including the design of the FPGA based setup used for prototype validation and mass testing of the approximately 6000 chips Long lasting experiments like the

ATLAS at the LHC undergo regular upgrades to improve their performance over time One of such upgrades of the ATLAS was the replacement of a fraction of muon detectors in the forward rapidities to provide much improved reconstruction precision and discrimination from background protons This new instrumentation New Small Wheel is equipped with custom designed radiation hard on detector electronics with the Read Out Controller chip being a mission critical element The chip acts as a clock and control signals distributor and a concentrator buffer filter and real time processor of detector data packets The described and deployed FPGA based test setup emulates the asynchronous chip context and employs optimizations and automatic clock and data synchronization The chip s tolerance to nuclear radiation was evaluated by recording its operation while controlled ultrafast neutron beams were incident to its silicon die Predictions for the operating environment are made A proposed implementation of an FPGA Integrated Logic Analyzer that mitigates the observed limitations and constraints of the existing ones is included
