Suri, 2008 This groundbreaking resource offers you exclusive coverage of the latest techniques in diagnostic and therapeutic 3 D ultrasound imaging instrumentation and techniques Providing a solid overview of potential applications in clinical practice you find need to know details on major diseases including vascular diseases breast cancer cardiac abnormalities and prostate cancer Ultrasound Imaging João Miguel Sanches, Andrew F. Laine, Jasjit S. Suri, 2011-12-14 Diagnostic and Therapeutic Ultrasound has recently taken an explosive growth for better safer economic mobile and high quality healthcare This technology is very appealing for medical applications because it is non ionizing non invasive and it is available in most of the medical and clinical facilities Its low cost when compared with other medical image modalities makes it one of the preferred tools for medical monitoring follow up and diagnosis Besides the traditional fields of Cardiology and Obstetrics where it is extensively used for long time it has become also very useful in the diagnosis of diseases of the prostate liver and coronaries and carotids atherosclerosis However Ultrasound images present poor quality very low signal to noise ratio and a lot of artifacts The extraction of useful information from Ultrasound data for diagnosis is a challenge task that makes this medical image modality a very active field of research The difficulties are being overcome and novel and advanced methods are being proposed for detection characterization and segmentation of abnormalities in several organs In fact Ultrasound application range is vast covering almost all organs of the human body including the brain where Tran cranial Doppler Ultrasound is very important to assess the brain vasculature This book presents some of the recent advances in Ultrasound imaging technology covering several organs and techniques in a Biomedical Engineering BME perspective The focus of the book is in the algorithms methodologies and systems developed by multidisciplinary research teams of engineers and physicians for Computer Aided Diagnosis CAD purposes Cardiovascular and Cancer the most common life threatening diseases in western countries are two of the most important topics focused in the book However other advanced issues are also presented such as Intravascular Ultrasound 3D US and Ultrasound in Computer Aided Surgery CAS Some chapters are direct contributions from medical research groups where Ultrasound has also received great attention in the last decade By this new techniques based on Ultrasound were introduced in the clinical practice for diagnosis and therapeutics mainly in hospital facilities **Functional Imaging and Modeling of the Heart** Alejandro F. Frangi, Petia I. Radeva, Andres Santos, Monica Hernandez, 2005-06-13 The 1st and 2nd International Conferences on Functional Imaging and Modelling of the Heart FIMH were held in Helsinki Finland in November 2001 and in Lyon France in June 2003 These meetings were born through a fruitful scientific collaboration between France and Finland that outreached to other groups and led to the start of this biennial event The FIMH conference was the first attempt to agglutinate researchers from several complementary but often isolated fields cardiac imaging signal and image processing applied mathematics and physics biomedical engineering and computer science cardiology radiology biology

and physiology In the first two editions the conference received an enthusiastic acceptance by experts of all these communities FIMH was originally started as a European event and has increasingly attracted more and more people from the US and Asia This edition of FIMH received the largest number of submissions so far with a result of 47 papers being accepted as either oral presentations or posters There were a number of submissions from non EU institutions which confirms the growing interest in this series of meetings All papers were reviewed by up to four reviewers The accepted contributions were organized into 8 oral sessions and 3 poster sessions complemented by a number of invited talks This year we tried to allocate as many papers as possible as oral presentations to facilitate more active participation and to stimulate multidisciplinary discussions
