Van de Graaf generator:

A Van de Graaff generator will supply a charge to its dome and anything else in contact with the dome. When the object in contact is a person, the person is slowly charged. Similar charges accumulating on the person's hair cause repulsion amongst hair strands causing them to stand up.

Chemical Treatment of Waste Activated Sludge Antoine Prandota Trzcinski,2018-11-02 Recently research efforts aiming
to improve energy efficiency of wastewater treatment processes for large centralized wastewater treatment plants WWTPs
have been increasing Global warming impacts energy sustainability and biosolids generation are among several key drivers
towards the establishment of energy efficient WWTPs WWTPs have been recognized as major contributors of greenhouse gas
emissions as these are significant energy consumers in the industrialized world The quantity of biosolids or excess waste
activated sludge produced by WWTP will increase in the future due to population growth and this pose environmental
concerns and solid waste disposal issues Due to limited capacity of landfill sites more stringent environmental legislation and
air pollution from incineration sites there is a need to rethink the conventional way of dealing with wastewater and the
sludge production that comes with it This book provides an overview of advanced biological physical and chemical treatment
with the aim of reducing the volume of sewage sludge Provides a comprehensive list of processes aiming at reducing the
volume of sewage sludge and increasing biogas production from waste activated sludge Includes clear process flowsheet
showing how the process is modified compared to the conventional waste activated sludge process Provides current
technologies applied on full scale plant as well as methods still under investigation at laboratory scale Offers data from pilot
scale experience of these processes Serine Proteases—Advances in Research and Application: 2013 Edition ,2013-06-21
