Product description

OccuSwitch™ Wireless is a system for automatically controlling the lights based on occupancy. The system uses two parts: a ceiling-mounted sensor and a switch. The switch will turn the lights on and off based on the information it receives from the battery-powered sensor.

SAFETY

Parts of the switch carry mains power, which is a potential hazard. Follow safety rules during installation and use. Always read these safety instructions before installing, maintaining or carrying the switch, and always comply with these instructions.

- If you are unsure about any part of these installation instructions, consult a qualified electrician.
- The device is designed for indoor use only.
- Do not expose the product to rain or moisture, to avoid short circuits. Short circuits may cause fire or electric shock hazard.
- Children should be kept away from the device. Do not use the device in areas where children are present.
- Use only a suitably rated cable. Do not use the device in areas where children are present.
- The device is not intended for use in areas where children are present.
- The product must be made impervious and secured against tampering. The device must be secured against tampering or replaced as soon as possible. Safety is likely to be impaired if, for example, the equipment fails to perform its intended function or if the equipment shows visible damage.
- Do not plug the device.

- **Switch only**
 - Disconnect power at circuit breaker or fuse when servicing.
 - Use the switch only with copper or copper clad wire.
 - Connect the switch to the power source according to the wiring diagram in this manual.

- **Sensor only**
 - The sensor cannot be used to control any load without a compatible switch.
 - Use only high-quality 3.6V lithium-thionyl chloride batteries with the sensor. Use (2) Lithium-thionyl chloride (GMR, 3.6V).
 - Using improperly rated batteries may damage the sensor.
 - Dispose of used batteries properly. Keep batteries away from children, do not disassemble and do not dispose of in fire.

WARNING: This product must not be used for medical equipment that could create hazardous situations when operated accidentally (e.g. emergency). Examples of equipment that must not be controlled with this product include (but are not limited to): medical pumps, garage doors, industrial doors, (automatic) doors, heating devices etc.

WARNING: It is the installer's responsibility to ensure that the equipment being controlled is suitable for use with remote control and that only suitable equipment is connected to these controls. Failure to do so could result in serious injury or death.

CAUTION: The battery used with the sensor device may present a risk of fire or other harm. For information, do not recharge, disassemble, heat above 100°C, or immerse in water. Replace battery with Lithium-thionyl chloride (GMR, 3.6V) only. Risk of another battery may present a risk of fire or explosion.

Product overview

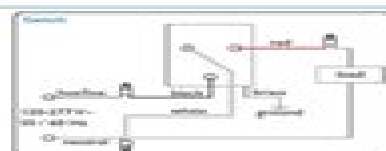

Movement detector ("sensor")

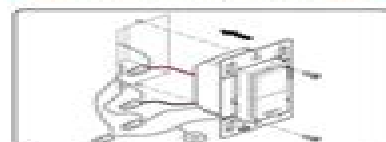

Wall switch ("switch")

Install the switch

- 1 Remove the old switch, if needed.
- 2 Connect the wires according to the wiring diagram above.
- 3 Mount the switch in the wall base.

- 4 Place the switch into the wall base, and fix it with the mounting bolts.
- 5 Power the mains at fuse or circuit breaker.

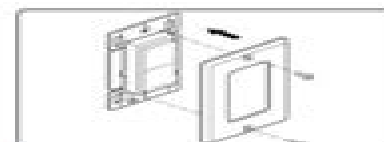

- 1 For a three-way circuit, connect the wires as follows:
 - The sensor switch (see below) to the line according to the regular wiring diagram.
 - The three-way switch (see below) to the line according to the wiring diagram above. Make sure that the switch has a steady load (resistor and neutral).

- 2 Test that the switch is wired correctly using the rocker to turn the light ON/OFF.

- 3 If installing in a multiplex wall base, break the tabs of existing index (Do not break the outside tabs on sensors at the end of the gang).

- 4 Attach a wall plate adapter and wall plate. Wall plate and adapter must be purchased separately.

2

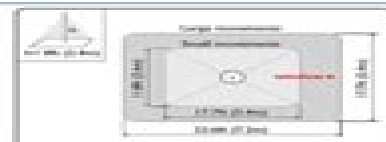

- 1 See the list on the sensor to it calculate for testing.
- 2 Place the battery into the sensor.

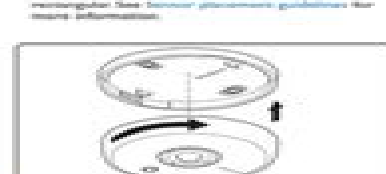

CAUTION: Only use a high-quality 3.6V lithium-thionyl chloride battery with the sensor. See SAFETY for more information on the battery.

- 4 Fix the mounting plate onto the sensor's location, using the mounting hardware. Alternatively, use toggle bolts (not included).

- 3 Choose the sensor location on the ceiling. The sensor must be in the mounting plate before the direction of the detector field, which is rectangular. See **Sensor placement guidelines** for more information.

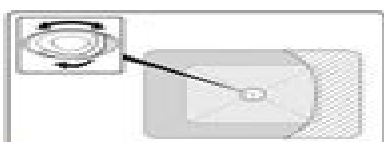

- 5 Place the sensor onto the mounting plate, and rotate clockwise to fix.

Install the sensor

Sensor placement guidelines

- The sensor should be mounted in such a way that:
 - Small movements are detected for the entire room.
 - Large movements are detected for the entire room, and in particular for the area near the doorway.
 - Motion from adjacent areas, e.g. the hallway is not picked up.
- The sensor of a room is usually not a good location. Motion from the room towards the wall where the door is located may still cover the entire room, while blocking unwanted detection of motion from the hallway.
- The sensor should not be placed close to heat sources (especially incandescent lamps) or HVAC outlets.

- 4 If needed, pull out the sensor shield (indicated on the ring with a dot), and rotate it in the required direction. This ring is covered to move (dotted in **Configure, test & finish**).
